BUREAU OF THE CENSUS

Richard M. Scammon, *Director*

A. Ross Eckler, *Deputy Director*
Howard C. Grieves, *Assistant Director*
Conrad Taeuber, *Assistant Director*
Herman P. Miller, *Special Assistant*
Glen S. Taylor, *Special Assistant*
Morris H. Hansen, *Assistant Director for Research and Development*
Joseph F. Daly, *Chief Mathematical Statistician*
Julius Shiskin, *Chief Economics Statistician*
Charles B. Lawrence, Jr., *Assistant Director for Operations*
C. F. Van Aken, *Special Assistant*
Walter L. Kehres, *Assistant Director for Administration*
M. Douglas Fahey, *Special Assistant*
Calvert L. Dedrick, *Chief, International Statistical Programs Office*
A. W. von Struve, *Public Information Officer*

Industry Division—Maxwell R. Conklin, Chief
Owen C. Gretton, Assistant Chief, Program Development
Jack L. Ogus, Assistant Chief, Research and Methodology
Louis J. Owen, Assistant Chief, Production and Process Statistics
Irving Rottenberg, Assistant Chief, Economic Research
Willis K. Jordan, Chief, Foods, Textiles, and Apparel
Cyril M. Wildes, Chief, Wood Products and Chemicals
Clarence H. Olsen, Chief, Metals, Machinery, and Equipment

Economic Operations Division—M. D. Bingham, *Chief*
Irving Weiss, Assistant Chief, Processing
Sol Dolleck, Assistant Chief, Systems

Administrative Service Division—Everett H. Burke, *Chief*
Agriculture Division—Ray Hurley, *Chief*
Budget and Management Division—Charles H. Alexander, *Chief*
Business Division—Harvey Kailin, *Chief*
Construction Statistics Division—Samuel J. Dennis, *Chief*
Data Processing Systems Division—Robert F. Drury, *Chief*
Decennial Operations Division—Morton A. Meyer, *Chief*
Demographic Surveys Division—Robert B. Pearl, *Chief*
Field Division—Jefferson D. McPike, *Chief*
Foreign Trade Division—J. Edward Ely, *Chief*
Geography Division—William T. Fay, *Chief*
Governments Division—Joseph F. Arbena, *Acting Chief*
Housing Division—Daniel B. Rathbun, *Chief*
Personnel Division—James P. Taff, *Chief*
Population Division—Howard G. Brunsman, *Chief*
Statistical Methods Division—Joseph Steinberg, *Chief*
Statistical Reports Division—Edwin D. Goldfield, *Chief*
Statistical Research Division—William N. Hurwitz, *Chief*
Transportation Division—Donald E. Church, *Chief*

Library of Congress Card No. A61-9403

This volume comprises the Area Reports, Series MC58(3), of the 1958 Census of Manfactures.

SUGGESTED CITATION

U.S. Bureau of the Census. *U.S. Census of Manufactures: 1958*
Vol. III, Area Statistics
U.S. Government Printing Office, Washington, D.C., 1961

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C., or any of the Field Offices of the Department of Commerce. Price —— $7.00

PREFACE

This is one of a series of volumes presenting final results of the 1958 Census of Manufactures. As for earlier censuses, the 1958 census was a large-scale undertaking which depended upon significant contributions from numerous public and private organizations and individuals. Basic to the census was the excellent cooperation of some 300,000 manufacturing establishments in completing the appropriate report forms. Also important to the conduct of the 1958 Census of Manufactures was the cooperation of the Bureau of Old-Age, Survivors, and Disability Insurance and the Internal Revenue Service in permitting use of certain records, thus making possible a material reduction in the cost of conducting the census.

The advice of trade associations, individual manufacturers, Government agencies, and research and marketing organizations was most valuable in determining the content of the reports and in developing techniques for minimizing the burden of reporting. Also noteworthy was the assistance of the Advisory Council on Federal Reports, which through special panels of industry experts advised on the feasibility of collecting various types of data. Timely publicity was given to the census by Chambers of Commerce, the National Association of Manufacturers and other business groups, trade papers, local newspapers, and television and radio stations.

The 1958 Census of Manufactures was conducted under the direction of Maxwell R. Conklin, Chief, and Owen C. Gretton, Assistant Chief, of the Industry Division. Within the Industry Division this responsibility was shared along industry lines by the following individuals who also contributed significantly to the entire census program: Willis K. Jordan, Foods, Textiles, and Apparel; Cyril M. Wildes, Lumber, Paper, and Chemicals; and Clarence H. Olsen, Metals, Machinery, and Equipment. Irving Rottenberg was responsible for the concepts and definitions of establishment-type data and for computer specifications for editing and tabulating the data. Jack J. Gottsegen developed the criteria for selecting commodity and material items in the output and input inquiries and for the standards for processing these data. Jack L. Ogus was responsible for the statistical methods and sampling used in the census.

The application of the system of the industrial classification of establishments was coordinated by Irvin Strauss in the later stages of the census and by Isidore Bogdanoff during the earlier period. Staff coordination on various phases of the processing of the establishment-type statistics and the preparation of the area and selected subject reports was the responsibility of Arthur W. Horowitz. The preparation of the final manuscript for printing was the responsibility of Angela R. Daly. Other staff area members whose contributions are deserving of special mention are: Donald F. Clark, William I. Karr, Peter R. Ohs, Edward K. Ricketts, and Robert Torene.

In the commodity areas of the Industry Division, staff statisticians developed the report forms for the various industries, reviewed the problem reports and tabulations, and prepared the industry texts that accompanied the data. These areas and those in charge are: Foods, Edward R. Robinson; Textiles, Milton Eisen; Apparel, Shirley Kallek; Lumber and Furniture, Elmer S. Biles; Paper, Printing, and Publishing, Edward D. Gruen; Chemicals, Reese R. Morgan; Metals and Metal Products, Paul F. Berard; Machinery, William R. Gray; and Electrical Machinery and Transportation Equipment, Bernard P. Bernsten. The names of supporting statisticians in the commodity areas that made significant contributions are shown in the introductory portion of the 80 industry reports which were published separately prior to their assembly into the Industry Volume.

Processing of the reports was performed in the Economic Operations Division under the supervision of Irving Weiss, Assistant Chief, Processing, assisted by Max E. Van Horn, for the Washington operations, and Charles Merzel, Donald E. Young, Wesley R. Grier, and Bernard M. Kinney for operations in the Census Operations Office in Jeffersonville, Indiana. Systems and procedures were developed under the supervision of Sol Dolleck, Assistant Chief, Systems, assisted by Samuel Schweid, for Methods Evaluation and Determination; Jack Margolis, for Liaison and Systems Development; Nathan Lesowitz, aided by Carl Mueller, for development and preparation of procedures; and Jack Scharff, aided by Eugene L. Wendt, Mary H. Johnson, and Duryee Van Wagenen, for development and supervision of electronic computer programming. Quality control plans and procedures were developed and supervised by Herman H. Fasteau, assisted by George Minton, Alfred J. McKeon, and Ruth H. Mills. Scheduling, progress reporting, and related staff work were supervised by Wilbur J. Mathias and Margaret R. Rommel.

In the Data Processing Systems Division, Rudolph M. Micoly and James W. Shores supervised the scheduling and operation of electronic equipment; Edgar D. Morgan and William M. Gaines supervised equipment engineering and maintenance, and Mrs. Dorothy P. Armstrong supervised general-purpose computer programming activities, Joseph S. Pewterbaugh and Emil Gorgovits developed techniques and procedures relating to the machine tabulation phases; and Frank McGrath, assisted by Emma Gass, supervised the card punching.

Staff members in other divisions and offices of the Bureau also contributed to the various phases of the census. Robert Klove, Assistant Chief of the Geography Division, assisted by Robert P. Condon and Alford Archer, supervised the preparation of the maps and charts. Robert H. Brooks, Chief, Graphics Branch, Administrative Service Division, was responsible for the preparation of copy for reproduction. Sheldon M. Klein, Chief, and Ingrid L. Millison, of the Presentation Practices Branch, Statistical Reports Division, reviewed text material and table forms and assisted on publication problems. Harold T. Goldstein, of the Office of the Chief Economic Statistician, was responsible for the review of manufacturing industry coding manuals and for coordinating coding concepts with those followed in the Business and Minerals Industries fields. Robert D. Krook, Executive Officer, Census Operations Office at Jeffersonville, Indiana, was responsible for the phases of the processing operations performed there.

November 1961

1958 CENSUS OF MANUFACTURES FINAL REPORTS

Volume I: SUMMARY STATISTICS

Chapter
- I. General Summary
- II. Size of Establishments
- III. Type of Organization
- IV. Manufacturers' Inventories
- V. Expenditures for Plant and Equipment
- VI. Fuels and Electric Energy Consumed
- VII. Selected Materials Consumed
- VIII. Selected Metalworking Operations
- IX. Selected Costs and Book Value of Fixed Assets
- X. Distribution of Manufacturers' Sales
- XI. Industrial Water Use

SPECIAL REPORTS: Manufacturing Activity in Government Establishments, Series MC58(S)–1 (also appears in all three Volumes)
Location of Manufacturing Plants, by Industry, County, and Employment Size, Series MC58(S)–2.1—MC58(S)–2.9
Chapters I–XI also issued as separate reports in Series MC58(1)

Volume II: INDUSTRY STATISTICS

Separate chapters for each of 80 groups of related industries. These chapters include, for approximately 430 individual industries, statistics on detailed product shipments and materials consumption in terms of quantity and value, cost of fuels and electric energy, value added by manufacture, employment, payrolls, inventories, and capital expenditures.

Selected statistics are included for earlier census years. The 1958 statistics are based on the revised Standard Industrial Classification (July 1957 edition). Also included in this volume is a general summary chapter and separate summary chapters for each of the 20 major industry groups. (The 80 industry group chapters were issued as separate reports in Series MC58(2)–20A—MC58(2)–39E.)

Volume III: AREA STATISTICS

Separate chapters for each State, the District of Columbia, and Alaska and Hawaii. Statistics for standard metropolitan statistical areas, counties, and cities, and States by industry with cross-classification by industry groups for important standard metropolitan statistical areas and larger counties. These statistics are based on the revised Standard Industrial Classification (July 1957 edition). Also included in this volume is a summary chapter for each of the nine geographic divisions. (The area chapters were issued as separate reports, Series MC58(3)–1—MC58(3)–51.)

1958 CENSUS OF MINERAL INDUSTRIES FINAL REPORTS

Volume I: Summary and Industry Statistics

Volume II: Area Statistics

1958 CENSUS OF BUSINESS FINAL REPORTS

Volume I: Retail Trade—Summary Statistics
Volume II: Retail Trade—Area Statistics
Volume III: Wholesale Trade—Summary Statistics and Public Warehousing
Volume IV: Wholesale Trade—Area Statistics
Volume V: Selected Services—Summary Statistics
Volume VI: Selected Services—Area Statistics
Volume VII: Central Business District Reports

Manufacturing Activity in Government Establishments SR-1

APPENDIXES

A	Notes on Comparability of 1954 and 1958 Data for Selected Industries and Industry Groups	A-1
B	Industry Descriptions	B-1
C	Composition of Industries in the New Standard Industrial Classification Compared with the Old SIC	C-1
D	Census Report Forms and Punch Cards	D-1
E	Provisions of Law Relating to Census of Manufactures	E-1

The pages of each report were numbered independently; page numbers of State reports consist of two parts, the first part being a State designation numbered in alphabetic order of the States. Thus, page 1-1 is page 1 of the report for the State of Alabama; page 49-8 is the last page of the report for the State of Wyoming (final report MC58(3)-49).

Revisions of data previously published in the corresponding pages of Manufactures Area Statistics Final Reports Series MC58(3) are indicated by a symbol "r."

GUIDE TO CONTENTS OF AREA VOLUME TABLES

A. Description of Area Tables

(See next page for key to data contained in tables)

Table 1. --Manufacturing Employment and Payroll for the State and Its Standard Metropolitan Statistical Areas: 1958 and 1954.

Total number of employees and payrolls separated between employment at operating manufacturing establishments and at central administrative offices and auxiliary units, for each State and its standard metropolitan statistical areas.

Table 2. --General Statistics for the State and Selected Standard Metropolitan Statistical Areas With Comparative United States Data: 1958 and Earlier Years.

Selected general statistics totals (number of establishments, employment, payrolls, value added by manufacture, and new capital expenditures) for operating manufacturing establishments in each State and its standard metropolitan statistical areas with 40,000 or more manufacturing employees, extended as far back as comparable data are available.

Table 3. --General Statistics for Standard Metropolitan Statistical Areas, Counties, and Selected Cities: 1958 and 1954.

Selected 1958 and 1954 general statistics totals for each State, its standard metropolitan statistical areas, counties, and cities with 10,000 or more inhabitants.

Table 4. --General Statistics by Industry Group and Industry: 1958 and 1954.

Selected 1958 and 1954 general statistics for individual industries and industry groups in each State.

Table 5. --General Statistics for Standard Metropolitan Statistical Areas With 40,000 or More Manufacturing Employees, by Industry: 1958 and 1954.

Selected 1958 and 1954 general statistics for individual industries and industry groups within the larger standard metropolitan statistical areas of each State.

Table 6. --General Statistics for Selected Counties, by Industry Group: 1958 and 1954.

Selected 1958 and 1954 general statistics for industry groups with 500 or more manufacturing employees within each county.

Table 7. --Distribution of Establishments by Employment Size Class and by Major Industry Group, for Counties: 1958.

Number of establishments in 1958 grouped by employment size class and major industry group, for each State and individual counties.

1. Historical Note

The 1958 Census of Manufactures is the twenty-sixth such census of the United States. The first census of manufactures covered 1809, and (with the exception of 1829) a census was taken at 10-year intervals in connection with the decennial census of population up to and including 1899. It was conducted at 5-year intervals from 1904 through 1919, and every other year from 1921 through 1939. The census was suspended during World War II, but it was resumed for 1947. Legislation enacted in 1948 provided for a Census of Manufactures every 5 years, with annual sample surveys authorized for interim years. Annual surveys of manufactures have been taken for the years 1949 through 1953 and 1955 through 1957. A census of manufactures originally scheduled to cover 1953, was conducted for 1954 on the basis of special legislation authorizing this change.

The 1958 Census of Manufactures was conducted jointly with the Censuses of Business (Wholesale, Retail, and Services) and Mineral Industries, covering the United States, Alaska, Hawaii, Guam and the Virgin Islands. Separate Censuses of Manufactures and Business for 1958 were also conducted in Puerto Rico jointly with the Commonwealth Government. The statistics in this report do not include establishments in Alaska and Hawaii, which did not achieve Statehood until 1959. Reports for Alaska and Hawaii were issued separately in the series of area reports and appear as separate chapters in the Area Statistics volume.

2. Publication of the 1958 Census Results

Results of the 1958 Census of Manufactures are published in three volumes: Volume I, Summary Statistics, shows comparative statistics for industries, States, and principal metropolitan areas for the more important measures of the activity of manufacturing establishments--employment, payrolls, inventories, capital expenditures, value added by manufacture, important materials consumed, etc.; Volume II, Industry Statistics, is a consolidation of reports for the 80 groups of industries and shows detailed information on individual industries and products; Volume III, Area Statistics, shows for each State and its important metropolitan areas and counties, general statistics (number of establishments, number of employees, payrolls, value added by manufacture, and capital expenditures) for each of the industries or industry groups of consequence in that State or in its smaller areas. Totals for all manufacturing are shown for all counties and for cities of 10,000 inhabitants or more. Supplemental reports, such as the Index of the Physical Volume of Production, are also included in the publication program.

3. Significance of the Manufacturing Sector of the Economy

Manufacturing is the largest of the industrial sectors in the economy. Table A shows that manufacturing accounts for approximately 30 percent of the total national income. The next largest sector, wholesale and retail trade, covers less than 20 percent.

4. Definition of Manufacturing Industries

The 1958 Census of Manufactures covers all establishments primarily engaged in manufacturing as defined in the 1957 revision of the Standard Industrial Classification (SIC) Manual. This manual, issued under the auspices of the United States Bureau of the Budget, was first published in 1939. It represented in large part a codification and updating of the classification systems previously used in the censuses. During the 1940's substantial revisions in the classification of both manufacturing and nonmanufacturing industries were issued. Further SIC revisions approved by the Bureau of the Budget were adopted in the 1954 Censuses of Business, Manufactures, and Mineral Industries, but the SIC manual was not reissued at that time. Most of the SIC revisions used in the 1954 Censuses, as well as many other changes, were subsequently incorporated into the 1957 revision after extensive joint industry-government meetings.

The SIC is the system used by all Federal statistical agencies, by most State agencies, and many private organizations. There is no other industrial classification system in widespread use, nor is there any other general purpose system that is described in detail in official manuals or other published documents. Awareness of the SIC by business analysts, executives, statisticians, research scholars, and others has grown rapidly and will continue to increase particularly in view of the adaptability of the decimal numeric system in mechanical processing.

The SIC is an industrial classification of the total economy. It divides all activities into broad industrial divisions (manufacturing, mining, retail, agriculture, etc.). It further subdivided each division into major industry groups, then into industry groups, and finally into detailed industries. The numbering system provides flexibility, permitting use of classification at various levels of detail according to the specific needs and uses desired.

The manual defines manufacturing as the mechanical or chemical transformation of inorganic or organic substances into new products. The assembly of component parts or products is also considered to be manufacturing if the resulting product is neither a structure nor other fixed improvement. These activities are usually carried on in plants, factories, or mills, which characteristically use power-driven machines and materials-handling equipment.

Manufacturing production is usually carried on for the wholesale market, for transfer to other plants of the same company, or to the order of industrial users rather than for direct sale to the household consumer. Some manufacturers in a few industries sell chiefly at retail to household consumers through the mail, through house-to-house routes, or through salesmen. Some service activities (enameling, engraving, etc.) are included in manufacturing when they are performed primarily for the trade; but they are considered nonmanufacturing when they are performed primarily to the order of the household consumer.

Two general principles apply to the SIC as a whole: All economic activities should be accounted for, and each successive decimal within a major group should provide for further breakdown within a related field. In addition, for manufactures and most other sectors the system is aimed primarily at classifying the primary activity of an individual establishment as distinguished from the firm or enterprise which might consist of more than one establishment. Also, a good deal of attention has been given, especially in the manufactures sector, to the desirability of minimum criteria for the designation of the most detailed (4-digit) industries. In order to qualify as a separate 4-digit industry the aggregate of employment or volume of activity of the establishments to be included should be of significant size. For the 1957 revision, a manufacturing industry was ordinarily required to have in excess of 3,000 employees and $15 million value added by manufacture in order to be retained as a separate 4-digit industry; approximately twice these magnitudes were necessary for a new industry to qualify for a place in the SIC structure. Generally, the establishments included in an industry had to flow from the business structure itself; that is, the actual organization of industry as conceived of by the business community itself was an important factor.

Of course, many rather clearly defined groups of establishments are not economically important enough to meet the size criterion. These are either combined with a related larger industry or included in a "not elsewhere classified" category at the end of a 2- or 3-digit group.

Other principles or criteria are applied differentially. For the majority of the 426 manufacturing industries, the industry is defined in terms of a specific group of related products. Usually, but not always, the products are made of similar materials and by similar processes, and the producers usually compete with one another. In determining the boundaries of product defined industries, it is essential that each industry comprise a group of establishments whose output of products defining the industry (primary products) accounts for a relatively high proportion of the total shipments of the industry as well as of the total shipments of these primary products by establishments in all manufacturing industries.

Some industries are defined in terms of the processes or equipment used regardless of the final product of the establishment. A small number of industries are basically defined by material used as well as final product of the plant.

There are wide differences among industries in the extent to which the establishments classified in the industry (a) account for the total production of commodities "primary" to the industry, (b) produce products or services "belonging" to other industries, and (c) use similar materials or processes. (See paragraphs 7, 28, 29, and 30.) These variations and data limitations are not infrequently construed to be shortcomings in the classification system. This attitude mistakes the symptoms for the disease. The fact is that the limitations observed in the classification structure arise from the inherent complexity of our economic system and from the disparity among the individual producing units of which it is comprised. Any conceivable organization of economic units into classes will ordinarily show marked variations in most characteristics other than the one used as the criterion for classification.

Frequently the business world and other data users look at a group of establishments from more than one point of view. For example, modern high-speed computers are classified as office machines. This describes the purpose of the product. In a physical sense, however, such computers would be described as electronic devices. Similarly, paper bags, wooden boxes, glass bottles, tin cans, and steel barrels may all be classified as containers or they may be individually grouped with other products of similar materials such as converted paper products, wood products, glass products, etc.

No single classification system will satisfy all or even a large number of possible uses of the data to be classified. Accordingly, users of data frequently regroup detailed SIC industries into broad groupings along lines different from those in the SIC 2- and 3-digit categories. The Federal Reserve Board for many years has made combinations to stress such criteria as durable, nondurable, consumers, producers, finished, intermediate goods, etc. Other public and private agencies also recombine the detailed classes. By and large, the 4-digit industries are susceptible to allocation to such categories, while the 2-digit SIC groups are not.

The following types of activities, while having many of the characteristics usually found in manufacturing, are defined as nonmanufacturing by the SIC, and, therefore, are excluded from the census:

(a) Processing on farms when the raw materials are grown on the farm and the manufacturing activities (poultry dressing, milk and butter production, logging) are on a small scale without extensive use of paid labor. Also custom milling, cotton ginning, and similar activities.

(b) Mineral preparation such as the crushing, screening and concentrating of ores. However, mining performed as a secondary activity in conjunction with manufacturing is included in the census; for example, stone and clay mining at cement, lime and clay products plants.

(c) Custom work to the individual order of household consumers. Examples are custom tailoring, woodworking, lettering on monuments, setting of diamonds and the making of orthopedic appliances.

(d) Repair and other service activities, except specified services performed "for the trade." Repair shops of railroads are also excluded.

(e) Production of coke for own use by establishments owned by public utility companies.

Consistent with the SIC, the census does not cover manufacturing when performed (1) by retail establishments which sell most of their products on the premises directly to household consumers; e.g., retail bakeries, ice cream stores, and feed stores, (2) by contractors at the site of construction; e.g., production of paving mixtures; and (3) by educational, eleemosynary, and penal institutions.

It is not unusual for manufacturing establishments to engage also in such nonmanufacturing activities as repair work, merchandising of products without further processing, and installation work. Ordinarily, such nonmanufacturing receipts are small in relation to the manufacturing activities and, in such instances, it is not difficult to determine that the establishments should be included in the manufactures area. However, where these nonmanufacturing activities account for a significant proportion of total receipts of an establishment, the allocation of that establishment to the appropriate major economic sector is more difficult.

In the 1958 Economic Censuses, an establishment engaged in a combination of manufacturing and merchandising was assigned either to the manufacturing or the trade industries depending on which of these activities was estimated to account for the larger share of its "value added" or "income produced." This criterion, even though based on an approximation, was considered preferable to reported dollar volume of receipts from each type of activity, since manufacturing requires considerably more man-hours, salaries and wages, and other inputs per dollar of receipts than either wholesaling or retailing. In the case of establishments engaged in manufacturing and also in mining, repair work, installation, construction or other nonmanufacturing services, dollar receipts were used as the basis of classification because these activities require substantially comparable inputs per dollar of receipts.

Data were obtained on the manufacturing activities during 1958 of establishments owned and operated by the Federal Government (military arsenals, Navy yards, etc.) and of Federal and State prisons for the purpose of presenting complete information on manufacturing operations in the United States. Statistics on the employment, value added by manufacture, and products manufactured by these establishments are shown in a separate chapter in each Manufactures volume. Such data are not included elsewhere in the statistical tables and, thus, are not represented in any of the individual industry or industry group totals or area statistics appearing in the volumes. Information on Government-owned, privately-operated establishments is included throughout the statistical tables in the appropriate 4-digit industry on the same basis as privately-owned and operated plants.

5. The New Standard Industrial Classification

A revised edition of the SIC Manual was issued in 1957. In this revision extensive modifications were made in the manufacturing sector. Each establishment report processed in the 1958 Census of Manufactures was classified in accordance with both the old and the new SIC. The preliminary reports of the 1958 Census were tabulated on the old SIC. The final reports and volumes are published on the new SIC. Among the analyses made was a "bridge" tabulation showing the disposition of each "old" industry in terms of the "new" industries and, conversely, the composition of each new industry in terms of the old industries. These "bridge" tabulations are included as Appendix C in all bound volumes of the 1958 Census of Manufactures. In addition, for industries where the classification revision was extensive, data from the "bridge" tabulations are

included as table 1A in the Industry Statistics Volume and are discussed in the industry descriptions and definitions that precede the tables.

Historical information is unavailable for many industries because of the SIC revision. Where comparable 1954 data are shown for the revised SIC industries in the published tables, they were derived from previously published information. It was not possible to reclassify individual establishment reports to derive comparable historical data for all industries. In some instances, the 1954 data shown are substantially comparable and the minor elements of noncomparability are explained in footnotes and in industry texts. Appendix B contains further information on this subject.

It should be noted that extensive revisions of industry definitions, as occurred between the 1945 and 1957 editions of the SIC, may affect totals for industries which are not changed in definition. This may best be illustrated by the following two examples: Consider the case of an establishment with 60 percent of its output in Industry A and 40 percent of its output in Industry B. In a revision of industry definitions, B may be unchanged but Industry A may be separated into two new industries. Call the new Industries C and D. Assume that the hypothetical establishment on the new SIC produces 40 percent in B, 30 percent in C, and 30 percent in D. Such an establishment would be classified in Industry A on the old SIC and in Industry B on the new SIC. This occurs in spite of the fact that Industry B is conceptually unchanged. A reverse situation may also occur. Assume Industries X, Y, and Z on the old SIC, with Y and Z collapsed into new Industry W and Industry X unchanged. An establishment with output of 45 percent in X, 25 percent in Y, and 30 percent in Z would be classified in X on the old SIC. On the new SIC, the YZ combination into W would make it the primary product so that the establishment would be in the new industry W. In such a situation, the old industry X, unchanged in any way in its definition, loses an establishment.

A summary of the comparability, in terms of new SIC classification, at the 2-, 3-, and 4-digit levels is shown in table B.

TABLE B.--SUMMARY OF COMPARABILITY OF INDUSTRIES BETWEEN OLD AND NEW SIC

Category	2-digit	3-digit	4-digit
	Number of industries		
Fully comparable	5	77	267
Directly	5	67	233
By combination	0	10	34
Substantially comparable (approximately within 4%)	9	29	59
Directly	9	19	41
By combination	0	10	18
Noncomparable (more than 4%)	7	43	100
Total	21	149	426
	Employment (in millions)		
Fully comparable	2.4	5.7	8.0
Directly	2.4	4.6	6.6
By combination	.....	1.1	1.4
Substantially comparable (approximately within 4%)	8.4	5.4	3.4
Directly	8.4	3.8	2.5
By combination	.....	1.6	.9
Noncomparable (more than 4%)	4.6	4.3	4.0
Total	15.4	15.4	15.4

6. Definition of Establishment

The census of manufactures is conducted on an establishment basis. That is, a company operating establishments at more than one location is required to submit a report for each location; also, companies engaged in distinctly different lines of activity at one location are required to submit separate reports if the plant records permit such a separation and if the activities are substantial in size. There are relatively few cases of this type. Census tabulations of establishment reports, therefore, differ substantially from those prepared on a company basis, i.e., from consolidated reports which not only combine activities at different locations (thereby eliminating interplant transfers) but also include the nonmanufacturing activities of companies primarily engaged in manufacturing. Census figures will also differ to some extent from other tabulations based on establishment reports where the definition of an establishment as to location and line of activity is not so rigidly applied.

The requirement that distinct lines of activity at the same location be separately reported was selectively applied where the establishment produced and shipped significant amounts of products classified in different SIC industries. In widely varying degrees this product overlap exists in many manufacturing establishments. Generally, the amounts involved are not of serious proportion and even if feasible, the filing of separate reports would not be warranted as a practical matter. However, there are a number of plant locations at which 100 or more employees are engaged in each of two or more distinct lines of manufacturing as defined in the SIC. The Census Bureau requested separate reports in such instances in the 1958 Census, pointing out to the respondent that a limited amount of proration or estimating was acceptable in the preparation of such reports. For the most part, the effort was successful, particularly in the case of very large operations where failure to "split out" the different activities would have significantly distorted the relationship of the industry and product statistics. Not infrequently, though, the two groups of products were made on the same production lines by many of the same employees, and could not be distinguished sufficiently in the companies' records to provide establishment-type reporting. The extent to which such separations could not be achieved combined with the overlap contributed by the smaller plants (those with less than 100 employees) is shown for each industry in tables 5A and 5B of the appropriate chapter of Volume II, Industry Statistics.

In 1958, as in earlier years, a minimum size limit was set for including establishments in the census. Reports were required from all establishments employing one or more persons at any time during the census year. The same size limitation has applied since 1947 in censuses and annual surveys of manufactures. In the 1939 and earlier censuses, establishments with less than $5,000 value

of products were excluded. The change in the minimum size limit in 1947 does not appreciably affect the historical comparability of the census figures except for data on number of establishments for a few industries.

A special study of manufacturing plants with no employees in 1958 was made to analyze the amount of manufacturing activity conducted by these very small establishments. The study was made from a sample of Internal Revenue Service income tax returns by individuals (Form 1040, Schedule C) and partnership returns (Form 1065) for the year 1958. The income tax returns in the sample were coded to obtain those engaged in manufacturing activity and then checked against Bureau of the Census and BOASI records to isolate those with no paid employment. The results of this study are shown in table C. It will be noted that there were over 50,000 manufacturing establishments in this category in 1958, but these establishments had only about one-quarter of one percent of the total value of shipments of all manufacturing.

TABLE C.--MANUFACTURING PLANTS WITH NO EMPLOYEES: 1958

Code	Major industry group	Estimated number of establishments[1]	Estimated total receipts[1] (million $)
.....	Total.....	51,800	637
20	Food and kindred products	2,700	70
23	Apparel and related products.....	1,700	56
24	Lumber and wood products	13,600	116
25	Furniture and fixtures...	3,500	29
27	Printing and publishing..	11,500	104
32	Stone, clay and glass products.....	1,600	32
34	Fabricated metal products	1,500	46
35	Machinery, except electrical.....	6,500	59
39	Miscellaneous manufacturing.....	4,400	50
.....	All other groups.....	4,900	75

[1]In addition to possible error due to sampling, these estimates (particularly for number of establishments) are subject to considerable understatement because of limitations in classifying very small establishments as to whether they belong in or out of the manufacturing universe.

7. Industry Classification of Establishments

Each of the establishments covered in the census was classified in one of approximately 430 manufacturing industries in accordance with the industry definitions embodied in the SIC system. Under this system of classification, an industry is generally defined as a group of establishments producing a single product or a more or less closely related group of products. The product groupings from which industry classifications are derived are based on such considerations as whether they are typically produced by the same establishment, similarity of manufacturing processes, types of material used, types of customers, and the like. The group of products assigned to an industry is said to be "primary" to that industry. Accordingly, an establishment is classified in a particular industry if its production of the primary products of that industry exceeds in value its production of products of any other single industry. In a few instances, however, the industry classification of an establishment is determined not only by the products it makes but also by the processes employed in making those products.

While some establishments produce only the primary products of the industry in which they are classified, it is rare for all the establishments in an industry to specialize to this extent. The general statistics (employment, inventories, value added by manufacture, etc.) shown for an industry, therefore, reflect not only the primary activities of the establishments in that industry but also their activities of a secondary nature. For this reason, in relating the industry statistics (tables 1-4 in the Industry Volume) to the product statistics (table 6) showing shipments by all industries of the primary products of that industry, the composition of the industry's output as shown in table 5 should be considered.

The extent to which industry and product statistics may be matched with each other is measured by two ratios which are computed from transition tables 5A and 5B of the Industry Volume. The first of these ratios, called the primary product specialization ratio, describes the proportion of product shipments (both primary and secondary) of the industry represented by primary products. The second, defined as the coverage ratio, is the proportion of primary products shipped by the industry to total shipments of such products by all manufacturing industries.

The primary product specialization ratio measures the homogeneity of the industry in terms of end products. However, in many industries, individual establishments use a great variety of processes and materals to make the products falling into a single industry classification; e.g., industries such as toys, photographic equipment, and scientific instruments. Even where the process of manufacture tends to be relatively similar because the end products are narrowly defined, the processes carried on by particular establishments producing the end product may be markedly different. For example, in the refrigeration industry, there are instances of almost complete integration in which the production of the compressor and condensing unit, electric motor, and even the castings for those intermediate products, as well as the stamping of the case and the final assembly are all carried on at one plant. On the other hand, the condensing unit, the motor, and the case may be purchased and merely assembled into the finished product.

In many industries, the 1958 Census provides separate statistics on the production of intermediate commodities made and used (assembled) in the same plant. In addition, plants producing products for use in other plants of the same company are combined in the industry totals together with plants producing identical products for commercial sale (i.e., for sale to other companies). For those industries where the former type of operation is of consequence, that fact is pointed out in the introductory text for the industry. Also, the nature of variations in types of processes used and the production of intermediate parts and components in the same plant is described for those industries in which such situations are especially significant. This practice has been followed for many censuses in pulp and paper, textile fibers, yarn and fabric, and certain chemical industries. In recent censuses, this approach was further enlarged to include captive casting facilities, and to show captive metal fabricating activities such as stamping facilities, machine shops, and the like for the entire metalworking area.

Differences in the integration of production processes, types of operations, and alternatives in type of materials

used should be considered when relating the general items (employment, payrolls, value added, etc.) to the product and materials data.

Many small establishments reported no detailed product data but only enough information to permit coding them to a 4-digit old SIC industry. With the introduction of the new SIC system, a number of old SIC industries were split. The lack of separate information on the various products made by these establishments made it impossible to determine their appropriate new industry, and it, therefore, was necessary to assign them entirely to one of the resulting new industries. In two instances, industries 2541, 2542, and industries 2395 and 2396, these establishments were important enough to require that each of these pairs of industries be combined for publication purposes. In a few other industries, which are shown in table D, this problem affected the total establishment count and the number of establishments in the smaller size classes but usually had no appreciable effect on other statistics. For each set of industries enclosed by a bracket, the upper code number refers to the industry in which the establishments in question were classified, and other codes represent the industries in which some of these establishemnts would have been classified had they reported sufficient product detail. For all other industries whose definitions were revised by the new SIC, the effect of this problem was negligible.

TABLE D.--INDUSTRIES AFFECTED SUBSTANTIALLY BY MISCLASSIFICATION OF SMALL ESTABLISHMENTS RESULTING FROM REVISED INDUSTRY DEFINITIONS

New SIC code	Approximate data for potentially misclassified establishments		Total value of shipments of the specified industry (million $)
	Number of establishments	Value of shipments (million $)	
2092 2096	17	5	1,081 1,239
2261 2262 2269	148	44	686 211 158
2441 2442 2443	325	20	236 93 30
2661 2643	44	4	392 909
2761 2752	339	22	406 1,342
3272 3271	1,063	79	719 414
3441 3449	586	135	1,901 917

8. Geographic Areas

(a) Census Divisions and Regions:--In order to present census data at a level between the United States total and those for the individual 48 States (Alaska and Hawaii did not achieve Statehood until 1959), the Census Bureau has used regional groupings for over a century. Since the 1909 Census of Manufactures, the present nine geographic

TABLE E.--VALUE ADDED BY MANUFACTURE ADJUSTED, BY DIVISION AND STATE, 1958

Divisions, regions, and states	Value Added by Manufacture Adjusted (Millions)	Percent
United States, Total	141,270	100.0
New England	10,438	7.4
Maine	638	0.5
New Hampshire	491	0.3
Vermont	236	0.2
Massachusetts	5,130	3.6
Rhode Island	754	0.5
Connecticut	3,189	2.3
Middle Atlantic	34,839	24.7
New York	15,892	11.2
New Jersey	7,499	5.3
Pennsylvania	11,448	8.1
East North Central	40,938	29.0
Ohio	11,473	8.1
Indiana	5,478	3.9
Illinois	11,664	8.3
Michigan	8,364	5.9
Wisconsin	3,960	2.8
West North Central	8,870	6.3
Minnesota	2,050	1.5
Iowa	1,684	1.2
Missouri	3,251	2.3
North Dakota	63	0.1
South Dakota	114	0.1
Nebraska	536	0.4
Kansas	1,171	0.8
South Atlantic	14,291	10.1
Delaware	420	0.3
Maryland	2,379	1.7
District of Columbia	198	0.1
Virginia	2,123	1.5
West Virginia	1,215	0.9
North Carolina	3,083	2.2
South Carolina	1,360	1.0
Georgia	2,102	1.5
Florida	1,411	1.0
East South Central	6,402	4.5
Kentucky	1,782	1.3
Tennessee	2,207	1.6
Alabama	1,771	1.3
Mississippi	642	0.5
West South Central	7,791	5.5
Arkansas	592	0.4
Louisiana	1,430	1.0
Oklahoma	725	0.5
Texas	5,045	3.6
Mountain	2,251	1.6
Montana	197	0.1
Idaho	255	0.2
Wyoming	63	0.1
Colorado	782	0.6
New Mexico	115	0.1
Arizona	360	0.3
Utah	412	0.3
Nevada	68	0.1
Pacific	15,437	10.9
Washington	2,167	1.5
Oregon	1,222	0.9
California	12,048	8.5

Note: Detailed figures may not add to the totals because of independent rounding.

divisions have been used. Beginning with the 1939 Census, the nine divisions were grouped further into four geographic regions; Northeast, South, North Central, and West.

Not only are these groupings convenient for the summary presentation of census data below the U. S. level, but they are essential to presenting a maximum of geographic information in Industry Volume table 2 for those individual industries in which application of the census disclosure law precludes the publication of individual State's data. (See the discussion in section 33, "Confidentiality of Data for Individual Companies.") The relative importance of manufacturing among the States and divisions is shown in table E.

(b) Standard Metropolitan Statistical Areas.--In addition to the legally constituted geographic units--States, counties, and cities--"all manufacturing" totals have been tabulated for the approximately 190 standard metropolitan statistical areas, while industry group (2- and 3-digit) statistics have been tabulated for areas with 40,000 to 190,000 manufacturing employees and industry data (2-, 3-, and 4-digit) for areas with more than 190,000 employees. These industry statistics for each area are presented in table 5 in the report for each State. There are about 70 areas with more than 40,000 employees.

Standard metropolitan statistical areas (SMSA's) are integrated economic and social units with a large volume of daily travel and communication between the central city (having 50,000 or more population) and outlying parts of the area. Each area (except in New England) consists of one or more whole counties. An area may contain not only highly industrialized counties but also adjoining counties which, though primarily residential in character, contribute sifnificantly to the industrial counties' labor force and are socially and economically integrated with the central city. These areas were defined by the Federal Committee on Standard Metropolitan Statistical Areas of the U. S. Bureau of the Budget for general-purpose use throughout the Federal Government in presenting economic and social data. In the New England States, similar integration criteria have been applied in defining SMSA's on a city and town basis because towns are regarded as the significant unit in this region of the country.

The requirement that each SMSA consist of county units (except in New England) sometimes results in the inclusion in an area of a considerable amount of territory which would not ordinarily be considered "metropolitan," much less "industrial." It is recognized that metropolitan areas could be more accurately defined in terms of smaller area segments such as minor civil divisions, but the usefulness of areas so defined would be limited by the fact that many types of economic and social data are available only on a county basis.

Each SMSA is designated by the name of the principal city of the area. In addition to the name of the principal city, the area title may include one or two additional city names.

(c) Industrial counties.--In addition to industry statistics for SMSA's with 40,000 or more manufacturing employees, the Census of Manufactures presents data in table 6 of the State reports for each industry group (2- and 3-digit) in a county that had at least 500 manufacturing employees and would not result in disclosure of figures reported by individual companies.

(d) Cities of 10,000 Inhabitants or More.--As in 1954, summary totals are presented for individual cities having 10,000 inhabitants or more. The selection of cities for inclusion was made on the basis of the 1960 Census of Population which was taken as of April 1, 1960. No industry detail is shown for individual cities. Because of the precedence given to SMSA's and counties, most industry data for even large cities would necessarily be withheld from publication to avoid disclosure either directly or by subtraction from published county totals.

9. The Census Report Forms

Although only one report was required from each establishment in the 1958 Census of Manufactures, the diversity of manufacturing activities made it necessary to use over 200 different report forms to canvass the approximately 425 manufacturing industries. In order to obtain efficiently the data essential to the census in a manner consistent with considerations of cost and reportability by the respondent, it was decided to use "standard" forms, requiring full census detail only for those manufacturing plants above a given size in terms of number of employees. For the numerous smaller establishments, typically having less detailed records and representing a very minor portion of manufacturing output and employment, data requirements were limited to a relatively few key items on a series of short forms with different preprinted lists of product class items in the shipments inquiry. In a few industries, these small plants were typical and accounted for a substantial portion of the industry's totals in the aggregate. In such cases modified versions of short forms requesting additional items were used.

The size cut-off for short forms varied according to size composition of the industry so that, while the forms covered a small percentage of each industry's aggregates (employment, etc.), they did represent a much higher proportion of number of establishments. The cut-off generally ranged from 4 to 10 employees.

Using the administrative records of the Bureau of Old Age and Survivors Insurance in conjunction with existing Bureau of the Census records, it was possible to determine correctly, in most cases, the type of form each manufacturing establishment should receive.

Information was obtained on all 1958 forms regarding the physical location, Social Security employer identification number, company affiliation, and legal form of ownership. These facts not only provided for completeness-of-coverage control in the census (see section 11, Development of the Mailing List), but also permitted the classification of each establishment by geographic location and type of legal organization.

(a) Standard Forms.--Each standard form called for virtually the same general items--employment, payrolls, man-hours, materials costs, detailed fuels and electric energy costs, inventories, and capital expenditures--regardless of the industry or industry group. However, the forms differed in that detailed inquiries on the quantity and value of individual products shipped and individual materials consumed as well as miscellaneous inquiries such as types of operation and equipment were adapted to the individual industry or industry group. Almost 200 different forms were needed to allow for these adaptations. (A sample form appears in Appendix D.)

(b) General Short Forms.--These forms, designed for small establishemnts as noted above, were an abbreviated version of the standard forms and requested limited general

and product information. For example, only total employment and payroll figures were requested, without detail by functional class (i.e., production workers and all other employees); production-worker man-hours and wages were not required on short forms. Instead of detailed information on individual products (7-digits) the short forms requested value of shipments mainly in terms of product classes (5-digit). There were 20 different short forms each covering roughly a 2-digit major industry group.

(c) Modified Short Forms.--In manufacturing as a whole and in most industries, very small establishments account for only a minor part of employment or production. However, for a few industries, small plants constitute a significant proportion of the total. For these industries, modified short forms were used, with the same establishment type inquiries (i.e., employment, inventories, etc.) as appeared on the general short form. In the materials and product sections of these forms, however, greater detail was required, approaching the materials and product sections of the standard form counterparts for these industries. The industries covered in this manner were: Logging and Sawmills, Concrete Products, Dairy Products, and several printing and publishing industries.

(d) Form for Manufacturing Plants Under Construction During 1958.--This form was designed to obtain data on capital expenditures by manufacturing firms for new plants under construction during 1958 but not in operation by the end of the year. A regular census report of the type described in (a)-(c) above was not obtained from such establishments. The new plant form was sent to the 1,600 largest manufacturing firms, and to a sample of 1,700 other manufacturing companies. (For a discussion of the purpose and use of this form, see section 26, "Expenditures for Plant and Equipment.")

(e) Form for Separate Central Administrative Offices and Auxiliaries of Manufacturing Companies.--Separate reports for each central administrative office and auxiliary unit (e.g., storage warehouses, research laboratories, garages, repair shops etc.), which served the manufacturing establishments of the company were obtained if they were at locations different from the establishments served or if they serviced more than one manufacturing establishment. The report form included inquiries on payrolls, employment, inventories, sales and warehouse storage space. In the manufacturing sector there were approximately 4,500 such establishments in 1958. They accounted for about 600 thousand employees with payrolls of about $4.5 billion, which represent 3.8 percent and 5.7 percent, respectively, of the totals for all manufacturing.

The employment, payroll, and other related data for separate administrative offices and auxiliaries are not included in the operating manufacturing establishment totals, either for individual industries or industry groups. The employment and payrolls of such administrative offices and auxiliaries are, however, shown separately and also included in the "all manufacturing" totals in selected tables in the final volumes; e.g., table 1 of each State report.

10. Supplemental Surveys Conducted as Part of the Census of Manufactures

(a) Distribution of Manufacturers' Sales by Class of Customer.--Part of the 1958 Census of Manufactures consisted of a survey designed to collect data on the distribution of manufacturers' sales by class of customer. This survey was conducted on a sample basis. The sample panel of approximately 50,000 establishments reporting in the Annual Surveys of Manufactures for 1955-1957 was used in this survey. The reporting for the distribution of sales survey, however, was on a company basis rather than an establishment basis. The results of this survey have been published in separate subject reports (Series MC58(1)-10.20-39) and also as a chapter in Volume I, Summary Statistics.

(b) Supplementary Employee Costs, Cost of Maintenance and Repair, Insurance, Rent, Taxes, and Depreciation and Book Value of Depreciable Assets by Industry: 1957.--Another part of the census program consisted of a survey of supplementary employee costs, cost of maintenance and repair, insurance, rent, taxes, and depreciation and book value of depreciable assets. This survey covered the year 1957 and the Annual Survey of Manufactures sample panel was used. Results of this survey by industry and State have been published in separate reports (Series MC58(1)-9) and are also included as a chapter in Volume I, Summary Statistics.

(c) Industrial Water Use for 1959.--As a supplementary inquiry of the 1958 Census, approximately 11,000 manufacturing establishments were canvassed regarding water consumption in 1959. The panel of reporters comprised selected respondents who reported a consumption of 20 million gallons or more of water in 1954 when the first survey of industrial water use was conducted, and others based on industry and employment size. In addition to the items covered in the 1954 survey, the 1959 report provides the following additional information: (1) water intake data differentiated between quantities for steam generation and for other condensing and cooling purposes; (2) a three-way breakdown showing the amount of water discharged, by point of discharge; (3) information indicating whether the discharged water was treated prior to discharge; and (4) information relating to the purposes for which recirculated or reused water was utilized. Results of this survey by industry, State, and Water Use Regions have been published in a separate report (Series MC58(1)-11) and also appear as a chapter in Volume I, Summary Statistics.

11. Development of the Mailing List

The basic mailing list for the 1958 Censuses of Manufactures, Business, and Mineral Industries comprised all employers (except farmers, State and local governments, and other ineligible classes) who made one or more quarterly payments in 1958 under the Federal Insurance Contributions Act. The list, which was obtained from the Internal Revenue Service (IRS) of the Treasury Department, contained all of the information necessary for mailing the census questionnaires except the industry classification of the employer.

The IRS list was matched with various lists containing the industry code number (SIC) which was required for selection of the appropriate census report form. The matching operations, which were done on electronic equipment, were made possible by the fact that both the IRS list and the classified lists contained the Social Security employer identification (EI) number.

While the IRS list was the basic control mechanism, the 1957 Annual Survey of Manufactures was the principal device for mailing to large companies. This annual survey included all large manufacturing establishments (i.e., those with 100 or more employees), which in 1954 accounted for 74 percent of total employment. For smaller establishments, the principal source of industry codes was

the "employer master file" of the Bureau of Old-Age and Survivors Insurance (BOASI) of the Social Security Administration. The latter file was supplemented by independent lists for two industrial areas, apparel jobbers and milk bottlers. (The apparel jobber information came from a census commodity survey; the dairy list from State government sources.)

Further mailing list supplementation was necessary for "multiunit" companies--those with more than one manufacturing, mining or business establishment. A precanvass was conducted by use of Forms NCX-1A and NCX-1B. Form NCX-1A was sent to about 10,000 large companies and called for a listing of subsidiary corporations and of each establishment owned by the parent company or its subsidiaries. Form NXC-1B was sent to about 40,000 smaller firms. These forms differed only in that the NCX-1A prelisted all known establishments. The NCX-1B, which went to firms with less than 5 establishments in 1954, did not prelist the establishments. The pre-canvass was performed jointly for the Censuses of Manufactures, Business, and Mineral Industries.

A general purpose form, NCX-3, was used for concerns having EI numbers on the IRS list which did not match the classified lists, and in cases where the EI numbers matched but the classified lists did not provide sufficient information for selection of a specific questionnaire. The industry code of employers thus canvassed was assigned after receipt of the NCX-3 on the basis of the information reported on that form. When the establishment filing the NCX-3 was large or where otherwise necessary, additional information was obtained to complete the appropriate inquiries for the industry to which the establishment was assigned.

In the 1958 Census the report forms were distributed and returned by mail. Personal or telephone contact was made only when the manufacturer failed to respond to the initial request or to followup letters. The mailing, collection, check-in control, screening, coding, routine editing, and punching were performed at the Bureau's operations office in Jeffersonville, Ind. Subsequent work was done in Washington, D. C.

12. Completeness of Coverage

Since the 1958 mailing list was considered to be complete, no field coverage check was conducted. However, at various stages of processing of the reports, coverage checks were conducted with the aim of determining whether establishments on the original mailing list were represented in the processing stage under scrutiny.

In the process of review of the results, checks were also made to assure that all significant establishments were included in the tabulated totals. Results of tabulations for industry-State cells, 7-digit products, county-industry groups, and cities were compared with similar data from the 1954 Census and statistics compiled by other agencies. Where deemed appropriate, establishment by establishment comparisons were made between 1954 and 1958. For example, when a plant was tabulated in a particular city in the 1954 Census and was not in the initial tabulation for that city in 1958, a thorough search was made to assure that a report for the plant was received and correctly processed in the 1958 Census. In addition, the mailing list of small establishments derived from the IRS-OASI records obtained by the Census Bureau assured virtually complete coverage of small establishments.

13. Manufacturing Employees--Classifications Used

a. All Employees.--The category "all employees" comprises all full-time and part-time employees on the payrolls of operating manufacturing establishments who worked or received pay for any part of the pay period ended nearest the 15th of the months specified on the report form. Included are all persons on paid sick leave, paid holidays, and paid vacations during these pay periods. Excluded are members of the armed forces and pensioners carried on the active rolls but not working during the period. Officers of corporations are included as employees; proprietors and partners of unincorporated firms are, however, excluded from the total.

Production and Related Workers.--Workers (up through the working foreman level) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial, watchman services, product development, auxiliary production for plants' own use (e.g., power plant), record keeping, and other services closely associated with these production operations at the establishment covered by the report are included. Supervisory employees above the working foreman level are excluded from this category.

All Other Employees.--Represents nonproduction personnel of the manufacturing establishment, including those engaged in the following activities: factory supervision above the working foreman level, sales (including driver salesmen), sales delivery (highway truck drivers and their helpers), advertising, credit, collection, installation and servicing of own products, clerical and routine office functions, executive, purchasing, financing, legal, personnel (including cafeteria, medical, etc.), professional, and technical. Also included are employees on the payroll of the manufacturing establishment engaged in the construction of major additions or alterations to the plant and who are utilized as a separate work force.

(b) Central Administrative Office and Auxiliary Unit Employees.--Respondents were asked to file separate reports for any central administrative offices or auxiliary units at a different location from the establishments served or at the same location as one of these establishments but not operated as an integral part thereof and administered or served two or more establishments. The functions of employees in central administrative offices include: general company policy determination, planning and management (i.e., company purchasing, accounting, general engineering, direction of company personnel matters, and legal and patent matters). Auxiliaries are storage facilities, garages, repair shops, purchasing offices, sales promotion offices, and research laboratories serving the plants or central management of the company. Employment and payroll totals for the central administrative offices and auxiliaries are included in the 2-digit summary chapter of the Industry Volume and in some tables of the Area and Summary Volumes.

14. Manufacturing Employees--Average Employment

The 1958 report forms requested employment figures for "production and related workers" for four selected pay periods (i.e., production worker mid-month employment in March, May, August, and November). For "all other employees" only a mid-March figure was requested. Thus the "annual average" is composed of an average of the four monthly figures for the "production workers" plus the March figure for "all other employees."

This approach was initiated in the intercensal annual survey of manufactures to simplify the schedule format and lighten the reporting burden of respondents, since it was found that the average of these selected pay periods approximates very closely the average employment for the year that would be obtained from the 12 pay periods for almost all industries.

In the employment data shown in this report, the four-month average is shown for all industries. For a few highly seasonal industries, figures on production workers were collected for all twelve months and are shown in statistics for those industries.

15. Manufacturing Employees--Payrolls

This total includes the gross earnings paid in the calendar year 1958 to all employees on the payroll of operating manufacturing establishments. Respondents were told they could follow the definition of payrolls used for calculating the Federal withholding tax. It includes all forms of compensation such as salaries, wages, commissions, dismissal pay, all bonuses, vacation and sick leave pay, and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. The total includes salaries of officers of corporations; it excludes payments to the proprietor or partners of unincorporated businesses. Also excluded are payments to members of armed forces and pensioners carried on the active payroll of manufacturing establishments.

The 1958 Census definition of payrolls, identical to that recommended to all Federal statistical agencies by the Bureau of the Budget, is also the same as that used in 1954. It should be noted that this definition does not include employers' Social Security contributions, or other nonpayroll labor costs such as employees' pension plans, group insurance premiums, and workmen's compensation.

As in the case of employment figures, the payrolls of separate central administrative offices and auxiliary units of multiunit companies are not included in the totals for individual industries or industry groups but are shown in table 1 of each State report and in other selected tables in the Area and Summary Volumes.

16. Production and Related Worker Man-Hours

This total consists of all plant man-hours of production and related workers as defined above. It represents all man-hours worked or paid for at the plant including actual overtime hours (not straight-time equivalent hours). It excludes hours paid for vacations, holidays, or sick leave, when the employee was not at the plant. Where employees elected to work during the vacation period, only actual hours worked by such employees were reported. The man-hours figures issued in this report differ from those published monthly by the Bureau of Labor Statistics. The BLS data cover all hours paid for, whether or not worked, and relate only to the payroll period ending nearest the middle of each month.

Man-hours were generally well reported except in the case of small establishments which, as in the past censuses, experienced some difficulty in distinguishing between production and other types of workers, and except for some industries, like apparel, where work is commonly performed on a piece rate basis. Where man-hours were not reported and it was not feasible to obtain the information by correspondence, the data were estimated. Because this estimating was largely confined to small establishments, there is no significant qualification to the validity of overall industry and geographic area totals for man-hours, except for sawmills and a few other industries characterized by small establishments. However, the man-hour figures for establishments with fewer than 10 employees, shown in the size of establishment tables, should be interpreted with this factor in mind.

17. Cost of Materials, Etc., Consumed

An inquiry on the report forms requested information on the cost of materials, supplies, components, semifinished goods, fuels, and electric energy actually consumed or put into production during the year, and the cost of products purchased for resale by each manufacturing establishment, whether purchased, withdrawn from inventories, or received from other establishments of the company. "Cost" refers to direct charges actually paid or payable for items consumed or put into production during the year, after discounts, and including freight charges and other direct charges incurred by the establishment in acquiring these materials.

To arrive at the industry total "cost of materials, etc.," separate figures were obtained for (a) the total delivered cost of all raw materials, semifinished goods, parts, components, containers, scrap, and supplies put into production in 1958 or used as operating supplies and for repair and maintenance during that year; (b) the amount paid for electric energy purchased; (c) the amount paid for all fuels consumed for heat, power, or the generation of electricity; (d) the cost of work done by others on materials or parts furnished by manufacturing establishments (contract work); (e) cost of products bought and resold in the same condition. The total excludes the cost of services used, such as advertising, insurance, telephone, etc., and research, developmental, and consulting services of other establishments; it also excludes overhead costs, such as depreciation charges, rent, interest, royalties, etc.; it excludes materials, machinery and equipment used in plant expansion or capitalized repairs which are chargeable to fixed assets accounts. It should be noted that the inclusion of the cost of goods purchased for resale in the "total cost of materials" is a change in procedure from previous censuses.

In the case of costs reported for materials received from other plants of the same company or from a central materials depot (whether at the same or different physical location), the respondent was asked to approximate the commercial value of these materials, plus freight and other direct handling charges. For some industries in which there was no satisfactory market counterpart of the transferred material, special instructions were necessary. The respondent was also asked, where possible, to check that such approximated costs exceeded the value of shipments reported by the company's plant producing and transferring the goods only by the addition of freight and other direct charges.

It should be noted that the cost of fuel consumed under (c), above, does not include fuel used as a material in the manufacturing process; for example, coal used in the production of coke. Such costs were included with other materials costs in category (a), above.

A summation of industry cost of materials figures to industry group totals would result in large and unknown amounts of duplication, owing to the addition of costs reported by related industries engaged in successive fabrication stages in the production of finished manufactured prod-

ucts. For this reason, cost of materials figures are not shown at the industry group (3-digit) and major industry group (2-digit) levels. With some important exceptions (such as "refrigeration machinery," "radios and television receiving sets," and "motor vehicles and parts"), this duplication is not significant within individual industries.

18. Individual Materials Consumed

In addition to the total cost of materials, fuels, etc., which every establishment was required to report, quantity and cost information was collected on the use of 551 specific materials. Consumption information was also collected for an additional 320 items as part of the product sections of the report forms. The latter group typically consisted of items which were produced and also consumed by the producing establishments or by other establishments in the same industry. For example, many textile plants produced yarns and then used them in weaving or knitting fabrics. Also, in the steel industry, data on receipts and consumption of mill shapes were obtained as part of the inquiry calling for the production and shipments of these shapes.

Materials were covered in two ways. For 293 materials, every industry that consumed appreciable quantities of the material was canvassed so that the data would represent at least 90 percent of the total consumption by manufacturing industries. For the remaining 258 materials, information on consumption was obtained on a more limited basis, generally only from those industries in which the materials were an important part of total material costs. Of the 320 products for which consumption information was obtained, industries accounting for 90 percent or more of manufacturing consumption were covered for about 200 items.

Because American industry uses an enormous variety of materials, the number of materials for which "complete" coverage consumption data (90 percent or higher) were obtained had to be strictly limited. The selection of a particular material for such coverage was, therefore, based on the following criteria:

(1) The importance of the material as measured by the total value of United States consumption of the material;

(2) The percentage of total consumption accounted for by manufacturing establishments;

(3) The availability of consumption information from manufacturers' records; and

(4) In certain instances, other factors such as the strategic importance of the material or the availability of historical data on the use of the material.

The materials included on a limited coverage basis were chosen not only because they constituted important inputs for particular industries but, frequently, because they provided necessary classification information and other indirect measures. For example, an industry's production was of a heterogeneous character and materials consumed afforded a better measure of physical output than could be obtained from available production data.

Tabulated data on the materials consumed in an industry are usually shown in the report for that industry. In addition, for the 293 materials covered on a complete basis (see above), consumption by all industries and, frequently, by States is shown in Volume I. The data on materials consumed relate generally to the quantity and cost of materials purchased from other companies or obtained from other plants of the same company. However, for selected materials which are also importantly produced for use within the same establishment, information was requested on such captive production in quantity terms only.

Some undercoverage exists in the statistics for most individual materials. This undercoverage results from the fact that:

(1) Individual materials consumption information was obtained only from establishments using one of the Census of Manufactures long forms or one of the modified short forms. For the most part, therefore, plants with a very small number of employees are not represented in these statistics.

(2) Establishments consuming less than a specified amount of a material were not requested to report consumption of the material separately. For the majority of individual materials, the minimum amount was $5,000.

The use of such cut-offs, as well as the use of short forms, is not believed to have had a significant effect on the totals for most materials. However, for industries where a sizeable proportion of the activity is accounted for by small establishments or where a specified material is used in relatively small quantities, the above limitations may be of some consequence.

19. Value of Shipments

The amounts under "value of shipments" both for industries and for individual products or classes of products are the received or receivable net selling values, f.o.b. plant, after discounts and allowances, and excluding freight charges and excise taxes. However, where the products of an industry are customarily delivered by the manufacturing establishments (bakery products, fluid milk, and soft drinks, for example) the value of shipments is based on the delivered price of the goods rather than the f.o.b. plant price. For the tobacco and other industries where excise taxes are important, such taxes are covered separately.

Under the general heading of shipments, manufacturers were asked to include all items made by or for each establishment from materials owned by it, whether sold, transferred to other plants of the same company, or shipped on consignment. Also included were receipts for contract work and for such miscellaneous activities as sale of scrap and refuse, installation work by manufacturing plant employees, research and development work, and repair work. The net selling value of products made in one plant on a contract basis from materials owned by others was reported by the plant providing the materials. The value of products bought and resold without further processing (merchandising) was reported separately and is included in the value of shipments totals for each industry but not for individual products or classes of products. The inclusion of resales in total value of shipments is a change in procedure from earlier censuses. The 1954 data shown in these volumes and reports have been revised to include the value of resales.

In the case of multiunit companies, the manufacturer was requested to report the value of products transferred to other establishments of the same company (i.e., other manufacturing plants, separate sales branches, or retail stores) at "the nearest approximation to corresponding commercial values, f.o.b. plant, and not the cost of production."

The value of shipments for the industry is usually different from the value of shipments of the group of products regarded as "primary" to the industry. The value of shipments of primary products of an industry (tables 5 and 6 of Volume II, Industry Statistics) includes the value of such products reported by all producers, including those establishments in other industries which make these items as "secondary" products. However, that value does not include the value of secondary products of establishments classified in the industry, or receipts of such establishments for contract work and other miscellaneous activities. The general use of shipments as the basis for valuing the output of manufacturing industries differs from the practice for all censuses except those for 1954, 1947, and 1929. The selection of shipments in recent censuses was made in order to facilitate direct reporting from records of sales, shipments, or billings. Value of shipments for 1958 and 1954 may, however, be directly compared with value of products for earlier years. In the first place, it is likely that in earlier censuses many manufacturers valued their output in terms of shipments even though value of production was requested. Secondly, the changes in the value of finished goods inventories for most industries are of minor importance. The "value of production" was requested in the 1958 Census for a relatively few industries where such records are generally maintained in place of shipment figures and reporting of the latter would have involved undue difficulty for the respondent. These instances are noted in the tables and descriptive text for the industries involved.

20. Individual Products

For 1958, as for 1954, data were collected for almost all industries on the quantity and value of individual products shipped. In the 1958 Census, information was collected on the output of approximately 7,500 individual product items. The term "product" as used in the census represents the finest level of detail for which output information was requested. Consequently, it is not necessarily synonymous with the term product as used in the marketing sense. In some cases it may be much more detailed and frequently it is more aggregative. For example, automotive gasoline was reported as a single item. On the other hand, pharmaceutical preparations were distributed into nearly 100 items.

The list of products for which separate information was collected was prepared after consultation with industry and Government representatives. Comparability with previous figures was given considerable weight in the selection of product categories and comparable 1954 information is presented for most products at some level of detail.

Typically, quantity and value of shipments information was collected. In some cases quantity was not significant or could not be reported by manufacturers. For these products, only value of shipments was collected. Shipments include both commercial shipments and transfers of products to other plants of the same company. For industries in which a considerable portion of the total shipments are transferred to other plants of the same company, separate information on interplant transfers was also collected. Moreover, for products which are used to a large degree within the same establishment as materials or components in the fabrication of other products, information was collected on total production and often consumption of products produced in the same establishment. Generally, the information on production was also collected for products where significant differences between total production and total shipments sometimes occur. Other measures of output of products, such as value of work done for products with long production cycles, were used when appropriate and feasible.

21. Classes of Products

For the purpose of summarizing the product information, the separate products were aggregated into classes of products which were in turn grouped into all primary products of each industry. The code structure used is a 7-digit number for the individual product, a 5-digit code for the class of product, and a 4-digit code for the total primary products in an industry.

The 7,500 product items in the 1958 Census were grouped into approximately 1,100 separate classes. Products were grouped into product classes on the basis of general similarity of manufacturing processes, types of material used, and the like. However, the grouping of products was affected by the economic significance of the class and in some cases, dissimilar products were grouped because the products were not sufficiently significant to warrant separate classes.

The product class was developed in order to provide an intermediate level of classification for output information. Because of the reduced number of separate items and the increased number of companies producing the class of products, additional tabulations of output information, e.g., product class by State (table 6B of the Industry Volume) are feasible more frequently than would be possible for individual products. The increased number of companies minimizes the problem of protection against disclosure of information pertaining to individual companies.

22. Duplication in Cost of Materials and Value of Products

The aggregate of the cost of materials and value of shipments figures for industry groups and for all manufacturing industries includes large amounts of duplication since the products of some industries are used as materials by others. With some important exceptions, such as motor vehicles and parts, this duplication is not significant within individual industries but arises from the addition of related industries representing successive stages in the production of a finished manufactured product. Examples are the addition of flour mills to bakeries in the food group and the addition of pulp mills to paper mills in the paper and allied products group of industries. Estimates of the over-all extent of this duplication indicate that the value of manufactured products exclusive of such duplication--the value of finished manufactures--tends to approximate two-thirds of the total value of products reported in the census. Because of the unknown and varying amounts of duplication contained in cost of materials and value of products, these figures are not shown for groups of industries in this census and are also eliminated for a small number of individual industries containing serious amounts of duplication.

Even where no significant amount of duplication is involved, value of shipments figures are deficient as measures of the relative economic importance of individual manufacturing industries or geographic areas because of the wide variation in ratio of materials, labor, and other processing costs to value of shipments, both among industries and within the same industry.

23. Value Added by Manufacture

The standard formula for deriving value added by manufacture in 1958 was modified from the one used for earlier censuses. During the earlier period, the measure was obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. This item is referred to as unadjusted value added when it appears in the tables in this publication. For 1958, this measure of value added was adjusted by taking into account the following items: (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly) plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year. The resulting figure is the adjusted value added by manufacture.

The adjusted value added is given greater prominence in reports of the 1958 Census than in earlier censuses. In future Census publications, the concept of unadjusted value added will be dropped. The adjusted value added is superior because it is more comprehensive as an approximation of the net production of goods and services during the period covered by the report. Under the earlier concept, the value added in merchandising was omitted on the grounds that it did not accrue as a consequence of manufacturing functions. Under the new (adjusted) concept, the measurement of all activities of establishments defined as primarily manufacturing is accepted as the objective.

Value added avoids the duplication in the value of shipments figure which results from the use of products of some establishments as materials by others. Consequently, it is considered to be the best value measure available for comparing the relative economic importance of manufacturing among industries and geographic areas.

24. Value Added and National Income

Value added by manufacture should not be confused with "national income originating in manufacturing" as presented in the national income by industrial origin estimates compiled by the Office of Business Economics, Department of Commerce. The latter measure is the sum of factor costs incurred by an industry in production and is, therefore, a more "net" concept of value added than that used in the Census of Manufactures. "Income originating" excludes, in addition to cost of materials, such other costs as depreciation charges, State and local taxes (other than corporate income taxes), allowance for bad debts, and purchases of services from nonmanufacturing enterprises, such as contract costs involved in maintenance and repair, services of development and research firms, services of engineering and management consultants, advertising, telephone and telegraph expense, insurance, royalties, patent fees, etc.

In part, the national income originating estimates are prepared from company rather than establishment data. This will result in the inclusion of some part of the net value added by nonmanufacturing establishments of companies classified as being primarily manufacturing, and conversely, in the exclusion of some part of the net value added by manufacturing establishments of companies classified as primarily nonmanufacturing. It is believed that for manufacturing as a whole the net effect increases income originating. (In fact, in the Petroleum and Coal Products major industry group, nonmanufacturing activities of manufacturing companies are so significant that this is the one major industry group in which O.B.E. "income originating" exceeds "value added by manufacture" used by the Bureau of the Census.)

The figures shown in Table F should be reviewed in the light of these comments.

TABLE F.--COMPARISON OF NATIONAL INCOME ORIGINATING IN MANUFACTURING AND VALUE ADDED BY MANUFACTURE

(In millions of dollars)

Period	National income originating in manufacturing[1] (1)	Value added by manufacture (adjusted) (2)	Col. (1) divided by Col. (2) (3)
1958.....	103,817	141,270	.73
1957.....	112,476	147,838	.76
1956.....	109,268	144,909	.75
1954.....	91,057	117,031	.78
1947.....	58,717	[2] 74,290	.79
1939.....	17,925	24,487	.73
1929.....	21,888	30,591	.72

[1]Source: U. S. Income and Output and July 1961 Survey of Current Business.
[2]1947 and earlier figures are unadjusted value added.

Form MC-D11, Selected Costs and Assets of Manufacturing Establishments, collected data on some of the cost items which account for the difference between value added as defined in the Census of Manufactures and national income originating in manufacturing. The diagram below shows some significant facts about the conceptual difference between these measures of manufacturing activity.

It will be noted that value added as defined by Census procedures for 1957 was $147.8 billion or $35.3 billion greater than the estimate of national income originating in manufacturing in 1957. The MC-D11 survey for 1957 conducted by the Census Bureau compiled data on several cost items not deducted from value added. These costs amounted to $15.4 billion in 1957. There is an additional $19.9 billion gap between national income and value added which largely consists of expenditures for advertising, publicity, legal services, travel and communications, royalty payments, contract research, bad debts, entertainment, other professional services, and other expense items. Many of these are company-type expenses and cannot be reported on an establishment basis by multiestablishment firms. In addition, transfer payments, gifts, scholarships, and similar expenditures are not factor costs and contribute to the gap, since such charges are not deducted from value added.

25. Inventories

The value of beginning-of-year and end-of-year inventories, respectively, held by each manufacturing establishment was obtained in the 1958 Census. Separate inventory figures were requested for: (1) finished products; (2) work-in-process; and (3) materials, supplies, fuel, and other inventories.

1957 Comparative Statistics
(All figures in billions of dollars)

National income and gross product in manufacturing

National income:
- Payroll = 80.6
- Supplements to payroll = 7.2
- Total payroll = 87.9 } 112.5
- Other income = 24.6

+

Indirect taxes, transfer payments, and capital consumption charges less subsidies — Estimate not available

} = GNP[1]

[1]Estimates of GNP by industrial sector are not made by the National Income Division of the Office of Business Economics.

Value added as defined for the Census and Annual Survey of Manufactures

- Payroll of operating establishments = 76.4
- Supplements from MC-D11[2] = 6.0
- Payroll in CAO and other auxiliary establishments = 4.2
- Total = [3]86.6

- Taxes covered on MC-D11 = 1.5
- Depreciation on MC-D11 = 7.3

Cost items in value added, not in GNP:
- Covered in MC-D11
  - Maintenance and repair services purchased from other firms = 4.5
  - Insurance = .7
  - Rents = 1.4
- Not covered in MC-D11:
  - Advertising, legal, and other professional services, communications, royalties and patent fees, travel costs, publicity, transfer payments, etc. — Estimate not available

} 147.8

[2] MC-D11 was a survey of selected costs in 1957.
[3] Excludes supplements for employees at CAO's and auxiliaries.

Respondents were asked to report their inventories at approximate current costs if feasible; otherwise "at book values." Since different methods of inventory valuation are used (LIFO, FIFO, etc.) the definition of the value of inventories aggregate for all establishments in an industry is not precise. The figures on change in inventory between the beginning and the end of the year are of considerably greater significance.

In using inventory data by stage of fabrication for all industries and at the two-digit industry level the following should be noted. An item treated as a finished product by an establishment in one industry may be reported as a raw material by another establishment in a different industry. For example, the finished product inventories of a steel mill would be reported as raw materials by a stamping plant. Such differences are present in the inventory figures by stage of fabrication shown for individual industries, industry groups, and all manufacturing which are merely aggregates of figures reported by establishments in specified industries. Further, the total finished goods inventory for "all manufacturing" includes items that are not finished manufactured products.

For a few industries in the food group there are special problems in the handling of inventories by stage of fabrication. These are industries in which the products are usually stored under controlled conditions, and the products are aged. Included among such types of products are stemmed and dried tobacco, cheese, and whiskey. It is not clear whether such products should be treated as finished goods inventories or as work-in-process while in storage. In all of these industries substantial finished goods inventories have been reported. These data have been summarized in the inventory tables in a consistent manner for all of the years included in this report.

26. Expenditures for Plant and Equipment

In the 1958 Census, manufacturers were asked to report expenditures made during the year for permanent additions and major alterations to their plants, as well as for new machinery and equipment purchases, that were chargeable to fixed-asset accounts of manufacturing establishments and were of a type for which depreciation accounts are ordinarily maintained. Expenditures for machinery and equipment were to include those made for replacement purposes, as well as for additions to plant capacity. Excluded from such expenditure totals are costs of maintenance and repairs charged as current operating expense. Also excluded are expenditures for land and expenditures made by owners of plants and equipment leased to reporting manufacturers.

In addition to total capital expenditures, respondents were requested to indicate the following subtotals: (a) new structures and additions to plant (including major alterations and capitalized repairs and improvements); (b) new machinery and new equipment (including capitalized repairs and improvements); and (c) expenditures for used plant and used equipment acquired from others (including the United States Government). The publication of statistics on capital expenditures is generally confined to new plant and equipment (items (a) and (b) above).

In the 1947 Census and the 1949 and 1950 Annual Surveys, data on capital expenditures related only to manufacturing establishments that were in operation at some time during the report year. They did not include expenditures incurred during the year for constructing and equipping new plants not yet in operation, or for renovating idle establishments. To close this statistical gap, such supplemental capital expenditures data for plants under construction were obtained in the 1951 Annual Survey and in each succeeding annual survey of manufactures and census. The "under construction" survey included approximately 1,600 large manufacturing companies. In addition, reports were obtained from about 1,700 smaller companies, selected as a representative sample of all manufacturing concerns. The relative contribution of these smaller companies to the "under construction" expenditures is ordinarily less than one-tenth of the estimated total.

The capital expenditures figures in the Industry and Area Statistics Volumes do not cover idle plants and plants under construction that were not put into operation within the year 1958. Data on this type of capital outlay are shown by industry group and by State in the Summary Statistics Volume.

The census figures on capital expenditures differ from those estimates published from the Office of Business Economics-Securities and Exchange Commission sample survey. In addition to the sampling variation present in the latter data, a major source of difference is to be found in the scope of the two series. Census data relate only to manufacturing establishments, whereas the OBE-SEC series on expenditures, covers all establishments (manufacturing and nonmanufacturing) of companies classified as manufacturing concerns. This factor is particularly important in the petroleum industry, where company expenditures for developing new wells and new distribution facilities are ordinarily much larger than their capital expenditures at refineries. The OBE-SEC series excludes from the totals for manufacturing industries firms which operate manufacturing establishments but are primarily nonmanufacturing companies. Both series, it should be noted, exclude expenditures for plant and equipment at establishments owned by the Federal Government but operated under lease or contract by private companies.

27. Fuels and Electric Energy

Detailed statistics on the use of fuels by manufacturing establishments for power and heat were collected in the 1958 Census. The data were not available in corrected form in time for inclusion in the individual industry reports which constitute the Industry Statistics Volume; they do appear as a separate chapter in the Summary Volume. Separate figures were collected for coal, coke, fuel oil, gas, and "other fuels." Except for "other fuels," both quantity and cost data were collected for each of the fuels named. For "other fuels," only cost was collected. The fuels reported in this inquiry exclude those used by manufacturing establishments as a raw material. For example, coal consumed in the manufacture of coke is excluded from the fuel statistics.

Experience, based on past censuses, indicates that practically all of the information compiled on detailed fuels is reported by relatively large establishments in specific industries. Therefore, in the 1958 Census the detailed inquiries on fuel were not directed to (a) establishments classified in approximately 250 of the 450 industries (old SIC), of which 57 of the 250 industries are in the printing and apparel groups, and (b) establishments reporting on short forms. In addition, establishments in the fuel reporting industries were requested to report detailed fuel data only where the 1958 fuel expenditure equalled or exceeded $5,000. As a result of these limitations, it is estimated that the 1958 detailed fuel data, shown in the Summary Statistics Volume, by Industry and State, represent a coverage of approximately 94 percent of the total as reported in 1954.

Data were also collected on the use of electric energy in manufacturing. Separate figures were collected for the quantity and cost of electric energy purchased, the quantity of electric energy generated, and the quantity and value of electric energy sold. All of these data are shown in the Summary Volume chapter on Fuels and Electric Energy. Only the cost of purchased electric energy is contained in the Industry Volume (table 3).

28. Selected Metalworking Operations

For all industries in SIC Major Groups 35 and 37, and for selected 4-digit industries in Groups 19, 33, 34, 36, and 38, the 1958 Census included a special inquiry on "Selected Metalworking and Related Operations" to provide a measure of certain metalworking and related facilities in manufacturing. The following operations were included in this inquiry: iron or steel foundry; nonferrous foundry (except die casting); die casting (nonferrous metal only); forging--presses, hammers, or upsetters; electroplating; galvanizing and other hot-dip coating; heat treating or annealing of metals for production purposes; automatic screw machine department; machine shop; tool and die shop, if separate from machine shop; pattern shop (foundry patterns only--metal, wood, etc.); plate or structural fabrication; stamping, blanking, and forming; painting, lacquering, and enameling; plastics molding; assembly of product; and shipping department (including packing and crating).

The number of establishments performing these operations and the number of production workers engaged in these operations classified by size of the specific operation are shown by industry in table 1 and by geographic division and State in table 2 (Vol. I, Ch. 8, Selected Metalworking Operations). The size distribution is based on the number of production workers usually employed in the operation. In addition, for selected industries, the actual number of man-hours worked by production workers in specified operations is also shown.

Information on selected metalworking operations was obtained for practically all industries where such operations are important. For individual industries or groups of industries, the inquiry on metalworking and related operations was tailored to fit the principal operations that were characteristic of those industries. For example, the 1958 inquiry for SIC Industry 3691, "storage batteries," did not list electroplating; plate and structural fabrication; stamping, blanking and forming; and automatic screw machine operations, since the 1954 data indicated that these operations were relatively unimportant. Operations such as foundries; die casting; machine shops; and tool and die shops, which accounted for substantial employment in SIC Industry 3691, were included in this inquiry.

In many industries, however, small establishments reported on a short form that did not include the inquiry on metalworking operations. Also, a few larger establishments that filed standard forms did not report their metalworking operations. This has resulted in an understatement of the number of establishments maintaining specific

operations, primarily in the smallest size class, and to a much smaller degree an understatement of the total number of production workers in the operation.

An approximation of the coverage in terms of both the number of establishments and the total number of all employees is provided for both industry and geographic totals. The coverage for nearly all industries is over 90 percent and is highest in industries in which larger establishments predominate.

For foundry operations, the number of plants operating foundries consists of the number reporting the operation for each industry plus the number of establishments classified in the foundries industries. For forgings operations, the number of plants operating forge shops consists of the number reporting the operation for each industry plus the number of establishments classified in the forgings industry. In footnotes to table 1, 1958 data are shown for the number of establishments classified in these industries. For example, in addition to establishments shown in the table as operating foundries and die casting facilities, the number of establishments classified in the foundry industries is given in the footnote. In the State table, separate columns have been included giving the number of establishments classified in these industries in each State. Similarly, the form used by respondents in Industry 3471, Plating and Polishing, and in Industry 3479, Metal Coating, Engraving, etc., did not include the metalworking inquiry. Consequently, data for establishments in these latter industries were presented in the same manner as for the foundry industries.

A limited inquiry covering machine shops and pattern shop operations was included for the foundry industries, and an inquiry covering machine shops and tool and die shops was included for the forgings industry.

29. Selected Equipment Data

An inventory of textile equipment in place was obtained for a number of the important machines used in the basic textile industries. These data, grouped by type of operations or industry activity of the plant, are shown in a separate chapter in the Industry Volume (22.1). Information regarding the coverage of the inquiry is also shown.

Information on various types of presses and the quantity of crushed seed and oil produced from cotton seed, soy beans, and flax seeds by manufacturing plants was also compiled and issued as a separate report. These data are also included in the Industry Volume.

30. Special Departmental Reports

For paper plants, stone and clay plants and steel plants where vertically integrated activities are characteristic of establishment operations, selected employment information regarding certain departmental activities was obtained in the 1958 Census. Information relating to pulping departments, quarrying activities, and selected operations in steel plants is shown in the chapters for these industries in the Industry Volume.

31. Plant Specialization Data

In response to needs expressed by data users, a program of plant specialization statistics was developed for the 1958 Census. These data provide a more exact measurement of the relationship between the output of an industry and the statistics on employment and payrolls, cost of materials, etc., reported by the same industry. The plant specialization data (in table 8 of the Industry Volume) importantly supplement the information presented in industry tables 5A and 5B.

Specialization for an establishment is computed in two ways. The first computation is in terms of the ratio of all the primary products of the establishment to its total of primary plus secondary products; the second in terms of the ratio of the largest single product class of the establishment to its total of primary plus secondary products. Receipts for contract and commission work as well as other miscellaneous receipts are not included in the plant specialization computation. Establishments are then grouped according to their degrees of specialization at the two levels. The statistics presented in table 8 group establishments in three specialization ranges for most industries: 90 percent or more, 75-89 percent, and less than 75 percent. For each of these ranges at the two levels (all primary products and the product class), statistics are shown on employment and payrolls, value added, cost of materials, value of shipments, and new capital expenditures.

Certain product classes are primary to more than one industry. The industry classification of establishments primarily producing such classes of products is determined on the basis of the kind of operation performed in the establishment, e.g., making the product from purchased materials or from materials produced at the same location. In the plant specialization data (table 8), product classes primary to two or more industries are shown in each of the respective industries. For each industry, the specialization data by industry and product class include only those establishments producing the class of product in the manner defined (e.g., lubricating oils from purchased materials).

Table 8 of the Industry Volume permits analysis of an industry in terms of the differences introduced by variation among establishments in the degree of specialization in the products of the industry or a subgroup (5 digit.) For example, where the ratios of various statistics tend to be different for establishments specializing to different degrees in the products of the industry or in different product classes, the ratios for the industry as a whole would be significantly affected by shifts in product mix. It should be noted that for those industries in which a production process results in the manufacture of byproducts or other similarly higher correlated products which are separate product classes in the census, the degree of specialization in each of the product classes tends to be somewhat lower.

Differences in the degree of integration of production processes within establishments are often more important than the element of product mix. A partial measure of differences arising from this factor can be derived for some industries through the metalworking operations or other equipment data. For some other industries, data on the production and use of products within the same establishments may be used as an approximate measure (see also discussion in section 7, Industry Classification of Establishments).

32. Imputation of Data

Each "key" census total called for on the standard forms had its counterpart in the various short forms. The short forms, however, did not require the detailed distribution of such totals (see section 9, The Census Report Forms). It was necessary, therefore, to impute figures for these missing detail items in order to publish "universe" totals of manufacturing activity.

Imputation of missing items was made feasible by use of the Census Bureau's high speed electronic computer. The procedures for imputation were of two types. For short form respondents production workers and production worker wages were imputed from fixed ratios specified in advance from historical relationships of these items to total employees and total payroll. For other items to be imputed (for example, the breakdown of total capital expenditures to expenditures on structures, etc.), the imputation was made by a randomizing process in which similar establishments (same industry and size class) were used in deriving the ratios needed for imputation of the detailed data.

For industries characterized by establishments of some size, the percentage of imputation of general measures such as employment and payrolls, cost of materials, inventories, expenditures, and the like is negligible; for the industries in which small establishments account for a significant portion of the total, the percent may go as high as 10 or 25, but this occurs only in a handful of industries. Of the various statistics, man-hours worked tended to have a higher degree of imputation than the other items due to difficulties in reporting those data by small and medium-size establishments.

The major exceptions to the imputation procedure for missing data were the detailed products and materials, metalworking operations, and equipment inquiries. The value of products and the cost of materials, parts, supplies and containers for establishments not reporting the detailed inquiries were treated as "unspecified" materials or products in the appropriate tables. For metalworking operations and equipment, the statistics were based on establishments reporting data, with appropriate measures of coverage shown in the tables.

33. Confidentiality of Data for Individual Companies

The Bureau of the Census is prohibited by law from publishing any statistics that disclose information reported by individual companies. In the 1958 Census, as in 1947 and 1954, preference was given to geographic regions and divisions over individual States in applying disclosure rules; similarly, States took precedence over standard metropolitan areas, while such areas were given preference over counties, and counties over cities. In tables showing industry detail, major industry group (2-digit) totals were given preference over industry group (3-digit) totals which, in turn, had precedence over individual (4-digit) industries. Similarly, in product tables, 4-digit product groupings took precedence over 5-digit product classes; the latter were given precedence over individual 7-digit products.

Such order-of-precedence was used because (1) it was considered preferable to show regional data for an industry, even at the cost of withholding data for another (usually the least important) State in a region, rather than to show all publishable data for the individual States and group the disclosure States throughout the United States in an "all other" category as was done in the 1939 and earlier censuses; and (2) by giving preference to industry group statistics over individual industries within each State, the extent to which individual States can be compared within the SIC industry classification framework is increased.

For each producing State not shown separately in table 2 of the Industry Volume, a footnote gives the number of establishments and either an employment range or the actual employment figure. The employment is shown in a range if the State had less than 1,000 employees, and the employment data represented the total for only one or two companies, or if the exact figure would permit deriving (by subtraction) the number of employees in other States represented by only one or two companies. In addition, figures for States with less than 100 employees are shown only in the footnote together with the number of establishments and employment in a range.

In the Area Volume, figures are not shown for a county or for an industry within a State, metropolitan area, or principal industrial county if the publication of such statistics would disclose information for individual companies. In table 3 of that Volume, however, the number of establishments is shown for every county and the number of employees for most counties represented by three or more companies. Moreover, all counties having manufacturing establishments are included in table 7, showing for each county the distribution by employment size of establishments in each major industry group.

For industries with few establishments or considerable geographic concentration, it has frequently been necessary to use geographic regions broader than the traditional nine census divisions in order to show all plants by some geographic grouping. For this purpose the following combinations of Census divisions have been used:

NORTHEAST	SOUTH
New England	South Atlantic
Middle Atlantic	East South Central
	West South Central
NORTH CENTRAL	**WEST**
East North Central	Mountain
West North Central	Pacific

34. Abbreviations

The following abbreviations and symbols occur frequently in tables and footnotes:

. . .	zero
xxx	Not applicable
NA	Not available
n.e.c.	Not elsewhere classified
lin.	linear
equiv.	equivalent
hp	horsepower
kwh	kilowatt-hours
D	Withheld to avoid disclosing figures for individual companies
SIC	Standard Industrial Classification
n.s.k.	Not specified by kind

Other abbreviations, such as lb., gal., yd., doz., and bbl., are used in the customary sense. Where the term "tons" only is used, it refers to short tons of 2,000 pounds; where the figures are expressed in tons of 2,240 pounds, the unit of measure is specified as "long tons" or "gross tons."

GENERAL SUMMARY

Table 1.—General Statistics for Operating Manufacturing Establishments in the United States: 1958 and Earlier Years

(For explanation of column captions see Introduction)

Year[1]	Establishments, number		Proprietors and partners	All employees[2] [3]		Production workers			Value added by manufacture adjusted[5]	Capital expenditures, new[6]	Index of physical production
	Total	With 20 or more employees	(number)	Number[4]	Payroll ($1,000)	Number[4]	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)	1947=100
1958	298,182	95,061	185,148	15,393,766	73,749,749	11,644,213	22,632,571	49,503,844	141,270,297	9,075,759	[7]140

NA Not available.

[1]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[2]The figures for 1939-1958 include data for employees at manufacturing establishments who were engaged in distribution and in construction work. The extent to which data for such employees were included in the figures for earlier years is not known.

[3]In addition to the employment and payroll for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishment(s) of a company. These figures were collected by the Bureau of the Census for 1958 and 1954. They are shown in table 2.

[4]The method of compiling these figures has varied, as follows: All employees: for 1955-1958, figures represent the average of the number of production workers for the payroll period ended nearest the 15th of March, May, August and November, plus all other employees for the payroll period ended nearest the 15th of March; for 1949-1954, they represent an average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947, an average of 12 monthly figures for all employees; and for 1939 and prior years, the average number of production workers based on 12 monthly figures, plus the number of nonproduction workers for one payroll period (usually in October). Production workers: for 1949-1958, figures are based on employment for the payroll period ended nearest the 15th of March, May, August, and November; and for 1947 and prior years, they represent the average of 12 monthly figures.

[5]For the period 1954-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year. For 1849-1933, cost of contract work was not subtracted from value of shipments in calculating value added by manufacture.

[6]Does not include expenditures for plants under construction and not yet in operation. Figures for recent years for such capital expenditures are included in the expenditure section.

[7]Based on data shown in "Industrial Production-1959 Revision," page S-69, issued by the Board of Governors of the Federal Reserve System.

[8]Data for 1949 thru 1953 and 1955 thru 1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Surveys of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for these periods.

[9]The figures for 1939, but not for earlier years, have been revised on the basis of retabulation of the returns to exclude data for establishments classified as manufacturing in 1939 and prior years but classified as nonmanufacturing beginning with 1947. Value added by manufacture for 1939, prior to revision and on a basis comparable with 1937 and previous years, was $24.7 billion.

[10]Not revised to exclude data for establishments classified as manufacturing in 1939 and prior years but classified as nonmanufacturing beginning with 1947.

[11]The 1939 figures for "all employees" were revised on the basis of estimates rather than by retabulation of the 1939 reports. The estimates were made in the following manner: for number of employees, by multiplying the retabulated figure for number of production workers by the ratio of all employees to production workers computed from the unrevised 1939 statistics; for salaries and wages, by multiplying the retabulated wage figure by the ratio for salaries and wages also derived from the unrevised 1939 statistics.

[12]Not including data for salaried officers of corporations and their salaries and, therefore, not strictly comparable with figures for other years.

[13]These figures for 1899 and earlier years represent hand and neighborhood manufacturing operations.

Table 2.—Manufacturing Employment in the United States: 1958 and 1954

(For explanation of column captions see Introduction)

Code	Major industry group and year[1]	All establishments		Operating manufacturing establishments		Administrative offices and auxiliaries[2]	
		Number of employees	Payroll ($1,000)	Number of employees	Payroll ($1,000)	Number of employees	Payroll ($1,000)
	All industries, total:						
	1958	15,995,814	78,217,644	15,393,766	73,749,749	602,048	4,467,895

Table 2.–Manufacturing Employment in the United States: 1958 and 1954–Continued

(For explanation of column captions see Introduction)

Code	Major industry group and year[1]	All establishments		Operating manufacturing establishments		Administrative offices and auxiliaries[2]	
		Number of employees	Payroll ($1,000)	Number of employees	Payroll ($1,000)	Number of employees	Payroll ($1,000)
36	Electrical machinery:						
	1958	1,198,926	6,168,026	1,122,284	5,605,985	76,642	562,041
	1954	1,004,532	4,229,300	959,126	3,950,994	45,406	278,306
37	Transportation equipment:						
	1958	1,635,881	9,759,831	1,557,759	9,164,581	78,122	595,250
	1954	1,765,891	8,697,898	1,705,501	8,300,103	60,390	397,795
38	Instruments and related products:						
	1958	304,336	1,632,752	296,558	1,578,481	7,778	54,271
	1954	277,895	1,234,017	272,586	1,200,323	5,309	33,694
39	Miscellaneous manufacturing:[3]						
	1958	579,357	2,906,015	571,434	2,847,330	7,923	58,685
	1954	702,692	2,702,074	696,973	2,663,522	5,719	38,552

[1]The 1958 and 1954 data for central administrative offices and auxiliaries are not strictly comparable for the following reasons: (1) better total coverage was achieved in the 1958 Census in identifying and obtaining separate establishment reports for such activities; (2) the individual 1954 major industry group totals reflect the former Standard Industrial Classification system (of 1945) used in the 1954 Census, while the 1958 figures reflect the revised SIC system (of 1957) used in classifying such establishments.

[2]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location.

[3]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 3.–General Statistics for Operating Manufacturing Establishments,

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

*The 1954 figures are not shown because of revisions in the Standard Industrial Classification system which resulted in noncomparable data. For complete explanation of revisions to each industry, see specific industry chapter in 1958 Census of Manufactures, Volume II.

[1]The 1958 report form requested employment figures for "production workers" for four selected pay periods (i.e., production workers in the midmonth pay periods in March, May, August, and November). For all other employees, the mid-March figure was requested. Thus, the "All employees" figure is composed of an average of four monthly figures for the "production workers" plus the March figure for all other employees. For most industries in 1954, separate data for "All employees" and "Production workers" were collected for the same periods as 1958. However, for industries of a seasonal type, an average based on the midmonth employment for 12 months was used for 1954.

[2]Adjusted value added is obtained by subracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered and other receipts such as the sale of scrap. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]Does not include expenditures for plants under construction and not yet in operation. Figures for such capital expenditures will be shown in other tables.

[4]The "Primary product specialization ratio" measures the extent to which plants classified in the industry "specialize" in making products classified as primary to the industry. That is, value of shipments of primary products of plants in the industry is expressed as a ratio of the total shipments of all products made by these establishments, (excluding "Miscellaneous receipts," such as receipts for contract and commission work on materials owned by others, scrap and salable refuse, repair, etc.).

[5]The "Coverage ratio" measures the extent to which all shipments of primary products of an industry are made by plants classified in the industry. That is, value of shipments of the primary products made by plants classified in the industry is expressed as a ratio of the total shipments of primary products made by all producers, both in and out of the specified industry.

[6]The total value of shipments and total cost of materials figures for industry groups (2- and 3-digit) and a few individual industries (4-digit) have not been published due to the extensive duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

[7]The 1958 and 1954 "All industries" totals are not strictly comparable because of differences in scope between the two years in Major Groups 32 and 35. The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for 1954.

[8]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A of section relating to the specific industry in the 1958 Census of Manufactures, Volume II, for further information on the comparability of 1958 and 1954 statistics.

Footnotes continued on next page.

Footnotes for Table 3—Continued

[9]Comparable data for selected industries and industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected figures have been retabulated to present comparable 1954 and 1958 data. They are shown in the following table.

1958 SIC code and year	Total establishments	All employees		Production workers			Value added by manufacture, adjusted	Capital expenditures, new
		Number	Payroll	Number	Man-hours	Wages		
2611, 2621, 2631, and 2661.....1958..	846	223,249	1,240,267	185,788	401,178	961,834	2,792,951	424,737

365, 366, and 367.....1958..	2,622	486,895	2,383,746	346,831	679,909	1,443,358	4,159,349	235,018
1954..	2,268	445,817	1,752,211	333,364	653,130	1,152,459	3,160,950	132,581

[10]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

[11]Establishments in this industry reported value of production instead of value of shipments. Consequently, the formula for computing adjusted value added by manufacture was modified to exclude any change in finished products inventories between the beginning and end of the year.

[12]For further qualifications of the ratio for this industry see Appendix B - Industry Descriptions.

[13]Less than $500 thousand.

[14]It has been determined that 44 very small establishments accounting in the aggregate for $4,295,000 product shipments have been misclassified as to industry and properly should have been assigned to Industry 2643, Bags, except Textile Bags (formerly Industry 2661). This affects the total establishment count and the number of establishments in the smaller size classes, but has no appreciable effect on other statistics for this industry.

[15]The 1954 adjusted value added figures for industries classified in Major Group 27, Printing and Publishing Industries, do not reflect the change in inventories between the beginning and end of the year since inventory statistics were not collected from establishments classified in that industry group.

[16]Includes reports for Government-owned plants operated by private firms for the account of the Federal Government but excludes the activities of Government-owned and/or operated plants. However, capital expenditures of Government-owned-privately operated plants are excluded from the total for the industry.

[17]For 1958, a number of small establishments (under 20 employees) may have been misclassified in Industry 3661,Telephone;telegraph apparatus,because of insufficient product information. Although this has a significant effect on the number of establishments for this industry,it has virtually no effect on any of the other statistics, i.e., number of employees, salaries and wages, value added, etc. It is estimated that the effect on these principal statistics is less than 1 percent.

[18]Establishments in this industry reported value of work done instead of value of shipments. Consequently, the formula for computing adjusted value added by manufacture was not adjusted for any inventory changes between the beginning and end of the year. It does include value added by resales.

Table 4.–Detailed Statistics for All Operating Manufacturing Establishments in the United States by Major Industry Group: 1958

Item[1]	United States, total	Food and kindred products (SIC 20)	Tobacco products (SIC 21)	Textile mill products (SIC 22)	Apparel and related products (SIC 23)	Lumber and wood products (SIC 24)	Furniture and fixtures (SIC 25)

Used plant and equipment.....do....	29,897	45,144	66,798	54,800	83,881	9,255	11,710

Note: Detailed figures may not add to totals because of independent rounding or dropping of fractions rather than rounding in computer operations.

[1]In 1958, establishments that reported on the short form (generally those with less than six employees) were asked to show only their total payroll, total expenditures for new plant and equipment, total beginning and end of year inventories, and total cost of materials, supplies, fuel and electric energy. Their 1958 totals were prorated on the basis of 1958 averages of the establishments in the industry that reported detailed payroll, inventory, expenditure, fuel and electric energy data by type to obtain figures representing all establishments for 1958. In addition, the breakdown of employment between production workers and other employees and the imputation of production worker man-hours were accomplished by the same method.

[2]Includes privately owned and/or operated establishments classified in Industry Group 19, "Ordnance and Accessories." Government owned and operated establishments are excluded from the data.

Table 5.—Manufacturing Employment and Payroll for Divisions, States and Standard Metropolitan Statistical Areas: 1958 and 1954

NA Not available.

[1]The 1958 and 1954 data for central administrative offices and auxiliaries are not strictly comparable for the following reasons: (1) better total coverage was achieved in the 1958 Census in identifying and obtaining separate establishment reports for such activities; (2) the individual 1954 major industry group totals reflect the former Standard Industrial Classification system (of 1945) used in the 1954 Census, while the 1958 figures reflect the revised SIC system (of 1957) used in classifying such establishments.

[2]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment as the same location.

[3]The definitions of the standard metropolitan statistical areas are shown on pages 41-43.

[4]Comparable data for 1954 are not available due to a revision in the definition of the standard metropolitan statistical area. See the 1954 Census of Manufactures Area Statistics, Volume III, for statistics for the area as defined at that time.

[5]This area was first defined as a standard metropolitan statistical area in 1958. Therefore, 1954 data are not available.

STANDARD METROPOLITAN STATISTICAL AREAS

(Area titles and definitions of the two Standard Consolidated Areas and the 189 Standard Metropolitan Statistical Areas in the continental United States and in Hawaii, established by the Bureau of the Budget as of June 30, 1959)

Chicago, Ill.-Northwestern Indiana Standard Consolidated Area	Consists of Chicago, Ill., and Gary-Hammond-East Chicago, Ind., Standard Metropolitan Statistical Areas
New York, N. Y.-Northeastern New Jersey Standard Consolidated Area	Consists of the following Standard Metropolitan Statistical Areas: New York, N. Y.; Newark, N. J.; Jersey City, N. J.; Paterson-Clifton-Passaic, N. J.; and of Middlesex and Somerset Counties, N. J.
Akron, Ohio	Coextensive with Summit County, Ohio
Albany-Schenectady-Troy, N. Y.	Consists of Albany, Renssalaer, Saratoga, and Schenectady Counties, N. Y.
Albuquerque, N. Mex	Coextensive with Bernalillo County, N. Mex.
Allentown-Bethlehem-Easton, Pa.-N. J.	Consists of Lehigh and Northampton Counties, Pa., and Warren County, N. J.
Altoona, Pa	Coextensive with Blair County, Pa.
Amarillo, Tex.	Consists of Potter and Randall Counties, Tex.
Anderson, Ind	Coextensive with Madison County, Ind.
Ann Arbor, Mich	Coextensive with Washtenaw County, Mich.
Asheville, N. C	Coextensive with Buncombe County, N. C.
Atlanta, Ga	Consists of Clayton, Cobb, De Kalb, Fulton, and Gwinnett Counties, Ga.
Atlantic City, N. J.	Coextensive with Atlantic County, N. J.
Augusta, Ga.-S. C.	Consists of Richmond County, Ga., and Aiken County, S. C.
Austin, Tex	Coextensive with Travis County, Tex.
Bakersfield, Calif	Coextensive with Kern County, Calif.
Baltimore, Md	Consists of Baltimore city and Anne Arundel, Baltimore, Carroll, and Howard Counties, Md.
Baton Rouge, La.	Coextensive with East Baton Rouge Parish, La.
Bay City, Mich	Coextensive with Bay County, Mich.
Beaumont-Port Arthur, Tex	Consists of Jefferson and Orange Counties, Tex.
Binghamton, N. Y	Coextensive with Broome County, N. Y.
Birmingham, Ala	Coextensive with Jefferson County, Ala.
Boston, Mass	Consists of all of Suffolk County; Cambridge, Everett, Malden, Medford, Melrose, Newton, Somerville, Waltham, and Woburn cities, and Arlington, Ashland, Bedford, Belmont, Burlington, Concord, Framingham, Lexington, Lincoln, Natick, North Reading, Reading, Stoneham, Sudbury, Wakefield, Watertown, Wayland, Weston, Wilmington, and Winchester towns in Middlesex County; Beverly, Lynn, Peabody, and Salem cities, and Danvers, Hamilton, Lynnfield, Manchester, Marblehead, Middleton, Nahant, Saugus, Swampscott, Topsfield, and Wenham towns in Essex County; Quincy city, and Braintree, Brookline, Canton, Cohasset, Dedham, Dover, Holbrook, Medfield, Milton, Needham, Norfolk, Norwood, Randolph, Sharon, Walpole, Wellesley, Westwood, and Weymouth towns in Norfolk County; and Duxbury, Hanover, Hingham, Hull, Marshfield, Norwell, Pembroke, Rockland, and Scituate towns in Plymouth County, Mass.

Brockton, Mass	Consists of Brockton city, and Abington, Bridgewater, East Bridgewater, Hanson, West Bridgewater, and Whitman towns in Plymouth County; Avon and Stoughton towns in Norfolk County; and Easton town in Bristol County, Mass.
Buffalo, N. Y	Consists of Erie and Niagara Counties, N. Y.
Canton, Ohio	Coextensive with Stark County, Ohio
Cedar Rapids, Iowa	Coextensive with Linn County, Iowa
Champaign-Urbana, Ill	Coextensive with Champaign County, Ill.
Charleston, S. C	Coextensive with Charleston County, S. C.
Charleston, W. Va.	Coextensive with Kanawha County, W. Va.
Charlotte, N. C	Coextensive with Mecklenburg County, N. C.
Chattanooga, Tenn.-Ga.	Consists of Hamilton County, Tenn., and Walker County, Ga.
Chicago, Ill	Consists of Cook, Du Page, Kane, Lake, McHenry, and Will Counties, Ill.
Cincinnati, Ohio-Ky.	Consists of Hamilton County, Ohio, and Campbell and Kenton Counties, Ky.
Cleveland, Ohio	Consists of Cuyahoga and Lake Counties, Ohio
Columbia, S. C	Consists of Lexington and Richland Counties, S. C.
Columbus, Ga.-Ala	Consists of Chattahoochee and Muscogee Counties, Ga., and Russell County, Ala.
Columbus, Ohio	Coextensive with Franklin County, Ohio
Corpus Christi, Tex	Coextensive with Nueces County, Tex.
Dallas, Tex.	Consists of Collin, Dallas, Denton, and Ellis Counties, Tex.
Davenport-Rock Island-Moline, Iowa-Ill.	Consists of Scott County, Iowa, and Rock Island County, Ill.
Dayton, Ohio	Consists of Greene, Miami, and Montgomery Counties, Ohio
Decatur, Ill	Coextensive with Macon County, Ill.
Denver, Colo.	Consists of Adams, Arapahoe, Boulder, Denver, and Jefferson Counties, Colo.
Des Moines, Iowa	Coextensive with Polk County, Iowa
Detroit, Mich	Consists of Macomb, Oakland, and Wayne Counties, Mich.
Dubuque, Iowa	Coextensive with Dubuque County, Iowa
Duluth-Superior, Minn.-Wis	Consists of St. Louis County, Minn., and Douglas County, Wis.
Durham, N. C.	Coextensive with Durham County, N. C.
El Paso, Tex.	Coextensive with El Paso County, Tex.
Erie, Pa.	Coextensive with Erie County, Pa.
Evansville, Ind.-Ky.	Consists of Vanderburgh County, Ind., and Henderson County, Ky.
Fall River, Mass.-R. I	Consists of Fall River city, and Somerset, Swansea, and Westport towns in Bristol County, Mass.; and Tiverton town in Newport County, R. I.
Fitchburg-Leominster, Mass	Consists of Fitchburg and Leominster cities, and Lunenburg town in Worcester County; and Shirley town in Middlesex County, Mass.

STANDARD METROPOLITAN STATISTICAL AREAS—Continued

Flint, Mich	Coextensive with Genesee County, Mich.
Fort Smith, Ark	Coextensive with Sebastian County, Ark.
Fort Wayne, Ind	Coextensive with Allen County, Ind.
Fort Worth, Tex	Consists of Johnson and Tarrant Counties, Tex.
Fresno, Calif	Coextensive with Fresno County, Calif.
Gadsden, Ala	Coextensive with Etowa County, Ala.
Galveston, Tex	Coextensive with Galveston County, Tex.
Gary-Hammond-East Chicago, Ind	Consists of Lake and Porter Counties, Ind.
Grand Rapids, Mich	Coextensive with Kent County, Mich.
Green Bay, Wis	Coextensive with Brown County, Wis.
Greensboro-High Point, N. C	Coextensive with Guilford County, N. C.
Greenville, S. C	Coextensive with Greenville County, S. C.
Hamilton-Middletown, Ohio	Coextensive with Butler County, Ohio
Harrisburg, Pa	Consists of Cumberland and Dauphin Counties, Pa.
Hartford, Conn	Consists of Hartford city, and Avon, Bloomfield, Canton, East Hartford, East Windsor, Enfield, Farmington, Glastonbury, Manchester, Newington, Rocky Hill, Simsbury, South Windsor, Suffield, West Hartford, Wethersfield, Windsor, and Windsor Locks towns in Hartford County; Cromwell town in Middlesex County; and Vernon town in Tolland County, Conn.
Honolulu, Hawaii	Coextensive with Honolulu County, Hawaii
Houston, Tex	Coextensive with Harris County, Tex.
Huntington-Ashland, W. Va.-Ky.-Ohio	Consists of Cabell and Wayne Counties, W. Va.; Boyd County, Ky.; and Lawrence County, Ohio
Indianapolis, Ind	Coextensive with Marion County, Ind.
Jackson, Mich	Coextensive with Jackson County, Mich.
Jackson, Miss	Coextensive with Hinds County, Miss.
Jacksonville, Fla	Coextensive with Duval County, Fla.
Jersey City, N. J	Coextensive with Hudson County, N. J.
Johnstown, Pa	Consists of Cambria and Somerset Counties, Pa.
Kalamazoo, Mich	Coextensive with Kalamazoo County, Mich.
Kansas City, Mo.-Kans	Consists of Clay and Jackson Counties, Mo., and Johnson and Wyandotte Counties, Kans.
Kenosha, Wis	Coextensive with Kenosha County, Wis.
Knoxville, Tenn	Consists of Anderson, Blount, and Knox Counties, Tenn.
Lancaster, Pa	Coextensive with Lancaster County, Pa.
Lansing, Mich	Consists of Clinton, Eaton, and Ingham Counties, Mich.
Laredo, Tex	Coextensive with Webb County, Tex.
Lawrence-Haverhill, Mass.-N. H	Consists of Lawrence and Haverhill cities, and Andover, Groveland, Methuen, and North Andover towns in Essex County, Mass.; and Plaistow and Salem towns in Rockingham County, N. H.
Lewiston-Auburn, Maine	Consists of Auburn and Lewiston cities, and Lisbon town in Androscoggin County, Maine
Lexington, Ky	Coextensive with Fayette County, Ky.
Lima, Ohio	Coextensive with Allen County, Ohio
Lincoln, Nebr	Coextensive with Lancaster County, Nebr.
Little Rock-North Little Rock, Ark	Coextensive with Pulaski County, Ark.
Lorain-Elyria, Ohio	Coextensive with Lorain County, Ohio
Los Angeles-Long Beach, Calif	Consists of Los Angeles and Orange Counties, Calif.
Louisville, Ky.-Ind	Consists of Jefferson County, Ky., and Clark and Floyd Counties, Ind.
Lowell, Mass	Consists of Lowell city, and Billerica, Chelmsford, Dracut, Tewksbury, and Tyngsborough towns in Middlesex County, Mass.
Lubbock, Tex	Coextensive with Lubbock County, Tex.
Lynchburg, Va	Consists of Lynchburg city, and Amherst and Campbell Counties, Va.
Macon, Ga	Consists of Bibb and Houston Counties, Ga.
Madison, Wis	Coextensive with Dane County, Wis.
Manchester, N. H	Consists of Manchester city and Goffstown town in Hillsboro County, N. H.
Memphis, Tenn	Coextensive with Shelby County, Tenn.
Miami, Fla	Coextensive with Dade County, Fla.
Milwaukee, Wis	Consists of Milwaukee and Waukesha Counties, Wis.
Minneapolis-St. Paul, Minn	Consists of Anoka, Dakota, Hennepin, Ramsey, and Washington Counties, Minn.
Mobile, Ala	Coextensive with Mobile County, Ala.
Montgomery, Ala	Coextensive with Montgomery County, Ala.
Muncie, Ind	Coextensive with Delaware County, Ind.
Muskegon-Muskegon Heights, Mich	Coextensive with Muskegon County, Mich.
Nashville, Tenn	Coextensive with Davidson County, Tenn.
New Bedford, Mass	Consists of New Bedford city, and Acushnet, Dartmouth, and Fairhaven towns in Bristol County; and Marion and Mattapoisett towns in Plymouth County, Mass.
New Britain, Conn	Consists of New Britain city, and Berlin, Plainville, and Southington towns in Hartford County, Conn.
New Haven, Conn	Consists of New Haven city, and Branford, East Haven, Guilford, Hamden, North Haven, Orange, West Haven, and Woodbridge towns in New Haven County, Conn.
New Orleans, La	Consists of Jefferson, Orleans, and St. Bernard Parishes, La.
New York, N. Y	Consists of New York City, and Nassau, Rockland, Suffolk, and Westchester Counties, N. Y.
Newark, N. J	Consists of Essex, Morris, and Union Counties, N. J.
Newport News-Hampton, Va	Consists of Newport News and Hampton cities, and York County, Va.
Norfolk-Portsmouth, Va	Consists of Norfolk, South Norfolk, Portsmouth, and Virginia Beach cities, and Norfolk and Princess Anne Counties, Va.
Ogden, Utah	Coextensive with Weber County, Utah
Oklahoma City, Okla	Consists of Cleveland and Oklahoma Counties, Okla.
Omaha, Nebr.-Iowa	Consists of Douglas and Sarpy Counties, Nebr., and Pottawattamie County, Iowa
Orlando, Fla	Consists of Orange and Seminole Counties, Fla.
Paterson-Clifton-Passaic, N. J	Consists of Bergen and Passaic Counties, N. J.
Pensacola, Fla	Consists of Escambia and Santa Rosa Counties, Fla.
Peoria, Ill	Consists of Peoria and Tazewell Counties, Ill.
Philadelphia, Pa.-N. J	Consists of Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties, Pa., and Burlington, Camden, and Gloucester Counties, N. J.
Phoenix, Ariz	Coextensive with Maricopa County, Ariz.

STANDARD METROPOLITAN STATISTICAL AREAS—Continued

Pittsburgh, Pa	Consists of Allegheny, Beaver, Washington, and Westmoreland Counties, Pa.
Pittsfield, Mass	Consists of Pittsfield city, and Dalton, Lenox, and Lee towns in Berkshire County, Mass.
Portland, Maine	Consists of Portland, South Portland, and Westbrook cities, and Cape Elizabeth and Falmouth towns in Cumberland County, Maine
Portland, Oreg.-Wash	Consists of Clackamas, Multnomah, and Washington Counties, Oreg., and Clark County, Wash.
Providence, R. I.-Mass	Consists of Central Falls, Cranston, Pawtucket, Providence, and Woonsocket cities, and Burrillville, Cumberland, East Providence, Johnston, Lincoln, North Providence, North Smithfield, and Smithfield towns in Providence County, R. I.; Narragansett and North Kingstown towns in Washington County, R. I.; Warwick city, and Coventry, East Greenwich, and West Warwick towns in Kent County, R. I.; all of Bristol County, R. I.; and Jamestown town in Newport County, R. I. Also, Attleboro city, and North Attleboro and Seekonk towns in Bristol County, Mass.; Bellingham, Franklin, Plainville, and Wrentham towns in Norfolk County, Mass.; and Blackstone and Millville towns in Worcester County, Mass.
Pueblo, Colo	Coextensive with Pueblo County, Colo.
Racine, Wis	Coextensive with Racine County, Wis.
Raleigh, N. C	Coextensive with Wake County, N. C.
Reading, Pa	Coextensive with Berks County, Pa.
Richmond, Va	Consists of Richmond city, and Chesterfield and Henrico Counties, Va.
Roanoke, Va	Consists of Roanoke city and Roanoke County, Va.
Rochester, N. Y	Coextensive with Monroe County, N. Y.
Rockford, Ill	Coextensive with Winnebago County, Ill.
Sacramento, Calif	Coextensive with Sacramento County, Calif.
Saginaw, Mich	Coextensive with Saginaw County, Mich.
St. Joseph, Mo	Coextensive with Buchanan County, Mo.
St. Louis, Mo.-Ill	Consists of St. Louis city, and Jefferson, St. Charles, and St. Louis Counties, Mo.; and Madison and St. Clair Counties, Ill.
Salt Lake City, Utah	Coextensive with Salt Lake County, Utah
San Angelo, Tex	Coextensive with Tom Green County, Tex.
San Antonio, Tex	Coextensive with Bexar County, Tex.
San Bernardino-Riverside-Ontario, Calif	Consists of Riverside and San Bernardino Counties, Calif.
San Diego, Calif	Coextensive with San Diego County, Calif.
San Francisco-Oakland, Calif	Consists of Alameda, Contra Costa, Marin, San Francisco, San Mateo, and Solano Counties, Calif.
San Jose, Calif	Coextensive with Santa Clara County, Calif.
Santa Barbara, Calif	Coextensive with Santa Barbara County, Calif.
Savannah, Ga	Coextensive with Chatham County, Ga.
Scranton, Pa	Coextensive with Lackawanna County, Pa.
Seattle, Wash	Consists of King and Snohomish Counties, Wash.
Shreveport, La	Consists of Bossier and Caddo Parishes, La.
Sioux City, Iowa	Coextensive with Woodbury County, Iowa
Sioux Falls, S. Dak	Coextensive with Minnehaha County, S. Dak.
South Bend, Ind	Coextensive with St. Joseph County, Ind.
Spokane, Wash	Coextensive with Spokane County, Wash.
Springfield, Ill	Coextensive with Sangamon County, Ill.
Springfield, Mo	Coextensive with Greene County, Mo.
Springfield, Ohio	Coextensive with Clark County, Ohio
Springfield-Holyoke, Mass	Consists of Chicopee, Holyoke, Springfield, and Westfield cities, and Agawam, East Longmeadow, Longmeadow, Ludlow, Monson, Palmer, West Springfield, and Wilbraham towns in Hampden County; Northampton city, and Easthampton, Hadley, and South Hadley towns in Hampshire County; and Warren town in Worcester County, Mass.
Stamford, Conn	Consists of Stamford city, and Darien, Greenwich, and New Canaan towns in Fairfield County, Conn.
Steubenville-Weirton, Ohio-W. Va	Consists of Jefferson County, Ohio, and Brooke and Hancock Counties, W. Va.
Stockton, Calif	Coextensive with San Joaquin County, Calif.
Syracuse, N. Y	Consists of Madison, Onondaga, and Oswego Counties, N. Y.
Tacoma, Wash	Coextensive with Pierce County, Wash.
Tampa-St. Petersburg, Fla	Consists of Hillsborough and Pinellas Counties, Fla.
Terre Haute, Ind	Coextensive with Vigo County, Ind.
Toledo, Ohio	Coextensive with Lucas County, Ohio
Topeka, Kans	Coextensive with Shawnee County, Kans.
Trenton, N. J	Coextensive with Mercer County, N. J.
Tucson, Ariz	Coextensive with Pima County, Ariz.
Tulsa, Okla	Consists of Creek and Tulsa Counties, Okla.
Utica-Rome, N. Y	Consists of Herkimer and Oneida Counties, N. Y.
Waco, Tex	Coextensive with McLennan County, Tex.
Washington, D. C.-Md.-Va	Consists of Washington, D. C.; Alexandria and Falls Church cities, and Arlington and Fairfax Counties, Va.; and Montgomery and Prince Georges Counties, Md.
Waterbury, Conn	Consists of Waterbury city, Naugatuck borough, and Beacon Falls, Cheshire, Middlebury, Prospect, and Wolcott towns in New Haven County; and Thomaston and Watertown towns in Litchfield County, Conn.
Waterloo, Iowa	Coextensive with Black Hawk County, Iowa
West Palm Beach, Fla	Coextensive with Palm Beach County, Fla.
Wheeling, W. Va.-Ohio	Consists of Ohio and Marshall Counties, W. Va., and Belmont County, Ohio
Wichita, Kans	Coextensive with Sedgwick County, Kans.
Wichita Falls, Tex	Coextensive with Wichita County, Tex.
Wilkes-Barre—Hazleton, Pa	Coextensive with Luzerne County, Pa.
Wilmington, Del.-N. J	Consists of New Castle County, Del., and Salem County, N. J.
Winston-Salem, N. C	Coextensive with Forsyth County, N. C.
Worcester, Mass	Consists of Worcester City, and Auburn, Berlin, Boylston, Brookfield, East Brookfield, Grafton, Holden, Leicester, Millbury, Northborough, Northbridge, North Brookfield, Oxford, Shrewsbury, Spencer, Sutton, Upton, Westborough, and West Boylston towns in Worcester County, Mass.
York, Pa	Coextensive with York County, Pa.
Youngstown, Ohio	Consists of Mahoning and Trumbull Counties, Ohio

Table 6.—General Statistics for Operating Manufacturing Establishments by Divisions, States, and Large Standard Metropolitan Statistical Areas: 1958 and Earlier Years

(For explanation of column captions see Introduction)

Division, State, standard metropolitan statistical area, and year[1]	Establishments, number		All employees[2]		Production workers			Value added by manufacture, adjusted[3]	Capital expenditures, new[4]	Comparative employment indexes		
										Index of employment change 1954=100		Division, State, or SMSA as a percent of the United States
	Total	With 20 or more employees	Number	Payroll	Number	Man-hours	Wages			Division, State, or SMSA	United States	
				($1,000)		(1,000)	($1,000)	($1,000)	($1,000)

Table 6.–General Statistics for Operating Manufacturing Establishments by Divisions, States, and Large Standard Metropolitan Statistical Areas: 1958 and Earlier Years–Continued

(For explanation of column captions see Introduction)

Division, State, standard metropolitan statistical area, and year[1]	Establishments, number		All employees[2]		Production workers			Value added by manufacture, adjusted[3]	Capital expenditures, new[4]	Comparative employment indexes		
										Index of employment change 1954=100		Division, State, or SMSA as a percent of the United States
	Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)	Division, State, or SMSA	United States

Table 6.–General Statistics for Operating Manufacturing Establishments by Divisions, States, and Large Standard Metropolitan Statistical Areas: 1958 and Earlier Years–Continued

(For explanation of column captions see Introduction)

Division, State, standard metropolitan statistical area, and year[1]	Establishments, number		All employees[2]		Production workers			Value added by manufacture, adjusted[3]	Capital expenditures, new[4]	Comparative employment indexes		
										Index of employment change 1954=100		Division, State, or SMSA as a percent of the United States
	Total	With 20 or more employees	Number	Payroll	Number	Man-hours	Wages			Division, State, or SMSA	United States	
				($1,000)		(1,000)	($1,000)	($1,000)	($1,000)

Note: Detailed figures may not equal totals because of independent rounding.

NA Not available.

[1]For a description of the comparability of data for the various years, see footnote 1 to table 1 of the General Summary.

[2]Employment and payroll totals for the central administrative offices and auxiliary units are not included in the statistics shown in this table. See table 5 for data relating to these units.

[3]For the year 1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[4]Does not include expenditures for plants under construction and not yet in operation. Figures for recent years for such capital expenditures will be shown in the expenditure section.

[5]This table includes data only for standard metropolitan statistical areas with 40,000 or more manufacturing employees in 1958 or 1954. The definitions of the standard metropolitan statistical areas are shown on pages 41-43.

[6]Comparable data for years prior to 1958 are not available due to a revision in the definition of the standard metropolitan statistical area. See the 1954 Census of Manufactures Area Statistics, Volume III, for statistics for the area as defined at that time.

NA Not available.

[1] Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 1-3 of this report. These units reported 17,169 employees with a payroll of $97,724 thousand in 1954 and 38,801 employees with a payroll of $248,586 thousand in 1958.

[2] For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3] The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Censuses and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4] The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Surveys of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volumes for the respective periods.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 3 to table 1.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 1-3 of this report. These units reported 180,388 employees with a payroll of $1,206,412 thousand in 1954 and 228,362 employees with a payroll of $1,771,187 thousand in 1958.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Censuses and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Surveys of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volumes for the respective periods.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2] The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 3 to table 1.)

[4] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5] Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 1-3 of this report. These units reported 138,839 employees with a payroll of $892,794 thousand in 1954 and 175,267 employees with a payroll of $1,300,992 thousand in 1958.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Surveys of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volumes for the respective periods.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 3 to table 1.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 1-3 of this report. These units reported 25,186 employees with a payroll of $136,001 thousand in 1954 and 30,268 employees with a payroll of $200,786 thousand in 1958.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Censuses and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Surveys of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volumes for the respective periods.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 3 to table 1.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 1-3 of this report. These units reported 31,969 employees with a payroll of $215,413 thousand in 1954 and 44,179 employees with a payroll of $335,277 thousand in 1958.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Censuses and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Surveys of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volumes for the respective periods.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2] The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 3 to table 1.)

[4] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5] Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 1-3 of this report. These units reported 14,357 employees with a payroll of $75,808 thousand in 1954 and 16,395 employees with a payroll of $109,993 thousand in 1958.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Censuses and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Surveys of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volumes for the respective periods.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 3 to table 1.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	10 713	87 371	9 207	52 235
275 and 276	10 727	75 786	8 675	50 611
32 except 3272	24 731	233 966	22 899	157 902
327 except 3273	4 673	35 893	4 747	27 884

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 1-3 of this report. These units reported 17,642 employees with a payroll of $101,178 thousand in 1954 and 25,386 employees with a payroll of $177,958 thousand in 1958.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Censuses and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Surveys of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volumes for the respective periods.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 3 to table 1.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	13 463	116 896	12 141	81 737
275 and 276	12 514	92 935	10 142	62 168
32 except 3273	30 884	333 652	27 096	241 775
327 except 3273	7 983	87 019	6 387	57 029

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 1-3 of this report. These units reported 2,572 employees with a payroll of $14,259 thousand in 1954 and 4,136 employees with a payroll of $27,683 thousand in 1958.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Censuses and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Surveys of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volumes for the respective periods.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 3 to table 1)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
275 and 276	4 839	37 464	3 585	22 372

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 1-3 of this report. These units reported 25,040 employees with a payroll of $164,320 thousand in 1954 and 39,254 employees with a payroll of $295,433 thousand in 1958.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Censuses and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Surveys of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volumes for the respective periods.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 3 to table 1.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
275 and 276	26 890	252 612	21 564	163 889
32 except 3273	39 226	457 968	37 714	334 368
327 except 3273	8 533	91 539	8 592	72 227

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Birmingham Standard Metropolitan Statistical Area consists of Jefferson County, Alabama.

[3]The Columbus Standard Metropolitan Statistical Area consists of Chattahoochee and Muscogee Counties, Georgia, and Russell County, Alabama.

[4]The Gadsden Standard Metropolitan Statistical Area consists of Etowah County, Alabama.

[5]The Mobile Standard Metropolitan Statistical Area consists of Mobile County, Alabama.

[6]The Montgomery Standard Metropolitan Statistical Area consists of Montgomery County, Alabama.

[r]Revised.

Table 2.–GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

Year	Establishments, number		All employees[1]		Production workers			Value added by manufacture, adjusted[2]	Capital expenditures, new	Number of employees[1] for the United States and comparative indexes			
	Total	With 20 or more employees	Number	Payroll	Number	Man-hours	Wages			Number of employees, United States	Index of employment change 1954 = 100		State or SMSA as a percent of the United States
											State or SMSA	United States

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

Table 4.—GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1958 AND 1954

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	3 089	24 744	3 245	16 633
32 except 3273	7 378	76 283	7 310	59 171
327 except 3273	1 786	13 361	1 887	11 148
3441 and 3449	4 094	35 415	3 879	31 693
35 and 36	8 153	62 682	6 400	40 700

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

D Withheld to avoid disclosing figures for individual companies.
NA Not available.

[1] The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Blount	23
Butler	238
Calhoun	221, 229, 332, 349, and 367
Chambers	221, 226, 228, and 239
Clarke	225 and 242
Coffee	221 and 371
Colbert	307, 333, 335, and 344
Covington	221
Dale	372
Escambia	234
Etowah	221, 301, 331, and 332
Geneva	232
Jefferson	202, 204, 242, 251, 264, 271, 275, 281, 324, 325, 329, 331, 332, 344, 345, 349, 353, 364, 371, 372, and 374
Lee	221 and 226
Madison	221, 314, 372, and 398 + 399 + 190
Marengo	23
Marion	232
Marshall	22
Mobile	262, 264, 266, and 373
Monroe	234
Morgan	282 and 335
Pickens	364
Randolph	221
St. Clair	221
Shelby	221
Talladega	221, 262 and 282
Tallapoosa	221, 228 and 332
Tuscaloosa	262, 264, 301, and 332
Walker	221
Wilcox	24

[2] The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

State, county, and size class	Establishments, total	Number of establishments by major industry group (See headnote for titles)—

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Phoenix Standard Metropolitan Statistical Area consists of Maricopa County, Arizona.

[3]The Tucson Standard Metropolitan Statistical Area consists of Pima County, Arizona.

[r]Revised.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

	STANDARD METROPOLITAN STATISTICAL AREAS (None with 40,000 or more manufacturing employees in this State)												

NA Not available. [r]Revised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

D Withheld to avoid disclosing figures for individual companies. rRevised.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. [r] Revised.

[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2] The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5] Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
32 except 3273	1 253	14 825	1 005	8 480
327 except 3273	718	7 362	637	(D)
3441 and 3449	1 084	7 644	586	2 561

[6] Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(This state contained no standard metropolitan statistical area with 40,000 or more manufacturing employees in 1958 or 1954)

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies. [r]Revised.
NA Not available.

[1]The following country-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Cochise	333
Coconino	242
Maricopa	232, 271, 335, 357, 358 and 372
Pima	27 and 398 + 399 + 190

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3)

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products

Table 1.–MANUFACTURING EMPLOYMENT AND PAYROLL FOR THE STATE AND ITS STANDARD METROPOLITAN STATISTICAL AREAS: 1958 AND 1954

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State, standard metropolitan statistical area, and year	All establishments		Operating manufacturing establishments		Administrative offices and auxiliaries[1]	
	Number of employees	Payroll ($1,000)	Number of employees	Payroll ($1,000)	Number of employees	Payroll ($1,000)
ARKANSAS:						
1958	r88 655	r292 731	87 899	288 146	r756	r4 585
1954	79 052	221 763	78 391	218 473	661	3 290
STANDARD METROPOLITAN STATISTICAL AREAS						
FORT SMITH:[2]						
1958	8 140	28 842	8 129	28 727	11	115
1954	6 376	19 472	6 376	19 472	...	...
LITTLE ROCK - NORTH LITTLE ROCK:[3]						
1958	13 415	47 467	13 392	47 398	23	69
1954	11 640	34 008	11 626	33 889	14	119

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Fort Smith Standard Metropolitan Statistical Area consists of Sebastian County, Arkansas.

[3]The Little Rock-North Little Rock Standard Metropolitan Statistical Area consists of Pulaski County, Arkansas.

[r]Revised.

Table 2.–GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

Year	Establishments, number		All employees[1]		Production workers			Value added by manufacture, adjusted[2]	Capital expenditures, new	Number of employees[1] for the United States and comparative indexes			
	Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)	Number of employees, United States	Index of employment change 1954 = 100: State or SMSA	Index of employment change 1954 = 100: United States	State or SMSA as a percent of the United States

	STANDARD METROPOLITAN STATISTICAL AREAS (None with 40,000 or more manufacturing employees in this State)												

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.
[2]General statistics for Texarkana City in Bowie County, Texas, are shown in table 3 for the State of Texas.

Table 4.–GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1958 AND 1954

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2] The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(This State contained no standard metropolitan statistical area with 40,000 or more manufacturing employees in 1958 or 1954)

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

[1] In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2] The Bakersfield Standard Metropolitan Statistical Area consists of Kern County, California.

[3] The Fresno Standard Metropolitan Statistical Area consists of Fresno County, California.

[4] The Los Angeles-Long Beach Standard Metropolitan Statistical Area consists of Los Angeles and Orange Counties, California.

[5] The Sacramento Standard Metropolitan Statistical Area consists of Sacramento County, California.

[6] The San Bernardino-Riverside-Ontario Standard Metropolitan Statistical Area consists of San Bernardino and Riverside Counties, California.

[7] The San Diego Standard Metropolitan Statistical Area consists of San Diego County, California.

[8] The San Francisco-Oakland Standard Metropolitan Statistical Area Consists of Alameda, Contra Costa, Marin, San Francisco, San Mateo, and Solano Counties, California.

[9] The San Jose Standard Metropolitan Statistical Area consists of Santa Clara County, California.

[10] The Santa Barbara Standard Metropolitan Statistical Area consists of Santa Barbara County, California.

[11] The Stockton Standard Metropolitan Statistical Area consists of San Joaquin County, California.

[r] Revised.

Table 2.–GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

Year	Establishments, number		All employees[1]		Production workers			Value added by manufacture, adjusted[2]	Capital expenditures, new	Number of employees[1] for the United States and comparative indexes			
	Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)	Number of employees, United States	Index of employment change 1954 = 100: State or SMSA	Index of employment change 1954 = 100: United States	State or SMSA as a percent of the United States

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

D Withheld to avoid disclosing figures for individual companies. r Revised.
NA Not available.

[1] The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

[2] San Francisco City is coextensive with San Francisco County.

Table 4.–GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1958 AND 1954

FOOTNOTES FOR TABLE 4

[r] Revised.
*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.
D Withheld to avoid disclosing figures for individual companies.
[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."
[2] The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)
[3] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[4] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.
[5] Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	20 436	209 797	17 000	137 000
275 and 276	23 277	221 155	18 554	141 711
32 except 3273	34 298	406 800	33 115	297 934
327 except 3273	6 495	72 250	6 868	61 381
331 and 339	21 973	293 886	17 870	193 761
3441 and 3449	11 052	110 400	8 611	60 465
35 and 36	164 213	1 575 938	118 753	958 434
3613 and 3622	4 960	50 578	4 247	34 059

[6] Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

MANUFACTURES–AREA STATISTICS

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[4]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code and area	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1] The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Alameda	207, 264, 301, 322, 351 and 357
Calaveras	24
Contra Costa	203, 206, 263, 264, 265, 291, 331, 333, 344 and 36
Del Norte	243
Fresno	271 and 398 + 399 + 190
Kern	324
Los Angeles	207, 208, 225, 229, 235, 242, 244, 252, 253, 259, 264, 265, 273, 274, 276, 278, 279, 281, 282, 283, 284, 287, 291, 306, 314, 317, 322, 323, 325, 329, 331, 332, 335, 339, 341, 346, 348, 352, 357, 361, 362, 363, 365, 366, 369, 382, 383, 386, 391 and 396
Monterey	206 and 398 + 399 + 190
Orange	265, 306, 335, 346, 361, 366 and 398 + 399 + 190
Riverside	203, 324, 335, 36 and 372
Sacramento	271 and 372
San Bernardino	324, 331 and 363
San Francisco	207, 341 and 342
San Joaquin	244, 265 and 355
San Mateo	201, 207, 26, 285, 31,331 and 372
Shasta	249
Trinity	242
Ventura	372
Yolo	206

[2] The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.
[4] Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Denver Standard Metropolitan Statistical Area consists of Adams, Arapahoe, Boulder, Denver, and Jefferson Counties, Colorado.

[3]The Pueblo Standard Metropolitan Statistical Area consists of Pueblo County, Colorado.

[r]Revised.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

NA Not available. [r]Revised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

TRINIDAD	12	...	74	252	54	101	152	296	27	168	708

D Withheld to avoid disclosing figures for individual companies. [r]Revised.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.
[2]Denver County is coextensive with Denver City.

Table 4.–GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1958 AND 1954

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. rRevised.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
32 except 3273	3 453	35 982	2 787	23 231
35 and 36	6 586	66 680	5 408	37 244

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. rRevised.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries, total."

[2]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 6.—GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies. [r]Revised.
NA Not available.

[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Adams	372
Denver	26, 301, 306, and 325
Jefferson	208, 372, 398 + 399 + 190
Pueblo	331
Weld	206

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.
[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Bridgeport Standard Metropolitan Statistical Area consists of Bridgeport and Shelton Cities and Fairfield, Monroe, Stratford, and Trumbull Towns in Fairfield County; and Milford Town in New Haven County, Connecticut.

[3]Comparable data for 1954 are not available due to revisions in the definition of the Standard Metropolitan Statistical Area. For data based on the old definitions see the 1954 Census of Manufactures, Volume III, "Area Statistics."

[4]The Hartford Standard Metropolitan Statistical Area consists of Hartford City and Avon, Bloomfield, Canton, East Hartford, East Windsor, Enfield, Farmington, Glastonbury, Manchester, Newington, Rocky Hill, Simsbury, South Windsor, Suffield, West Hartford, Wethersfield, Windsor, and Windsor Locks Towns in Hartford County; Cromwell Town in Middlesex County; and Vernon Town in Tolland County, Connecticut.

[5]The New Britain Standard Metropolitan Statistical Area consists of New Britain City and Berlin, Plainville, and Southington Towns in Hartford County, Connecticut.

[6]The New Haven Standard Metropolitan Statistical Area consists of New Haven City and Branford, East Haven, Guilford, Hamden, North Haven, Orange, West Haven, and Woodbridge Towns in New Haven County, Connecticut.

[7]The Stamford Standard Metropolitan Statistical Area consists of Stamford City and Darien, Greenwich, and New Canaan Towns in Fairfield County, Connecticut.

[8]The Waterbury Standard Metropolitan Statistical Area consists of Waterbury City; Naugatuck Borough; and Beacon Falls, Cheshire, Middlebury, Prospect, and Wolcott Towns in New Haven County; and Thomaston and Watertown Towns in Litchfield County, Connecticut.

rRevised.

Table 2.–GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas. For some areas data are not available for the years prior to 1958 because of the revisions in the definition of the standard metropolitan statistical area.

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively, or almost exclusively, in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

Table 4.–GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. rRevised.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
32 except 3273	5 195	44 368	4 901	32 683
327 except 3273	964	8 445	702	5 349
331 and 339	4 642	43 953	8 000	66 600
3441 and 3449	1 465	13 962	326	2 355
35 and 36	91 155	795 939	103 402	794 899
3613 and 3622	3 042	29 809	3 354	24 340

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

NA Not available due to revisions in the definition of the standard metropolitan statistical area.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries, total."

[2]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

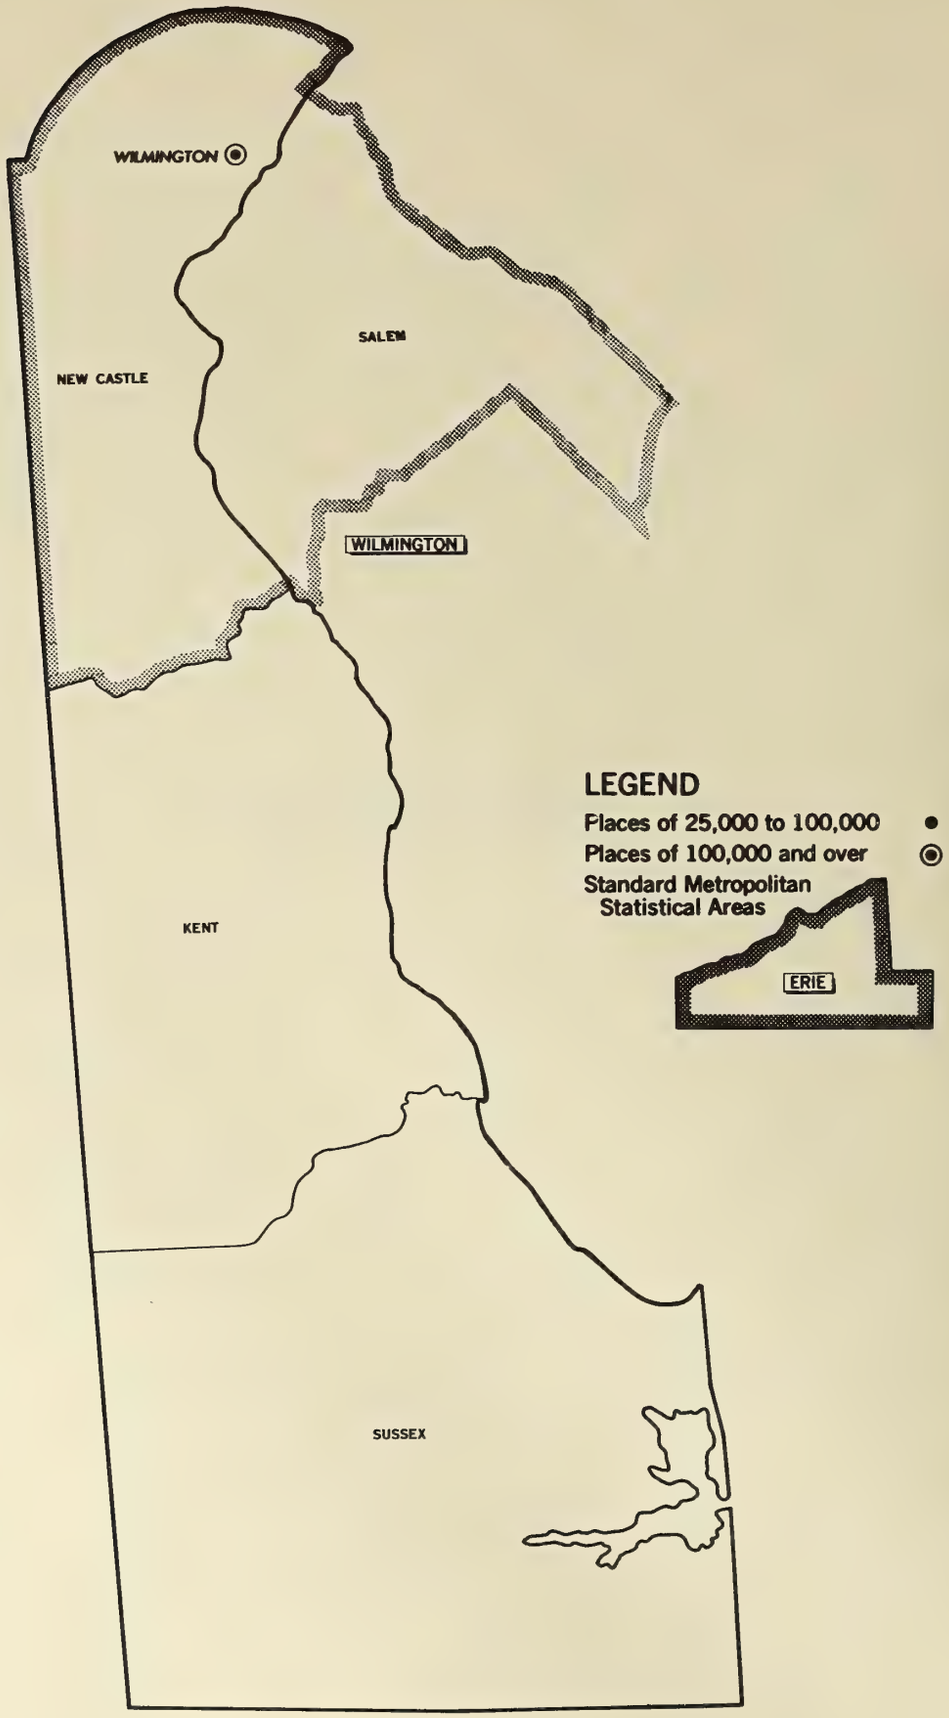
FOOTNOTES FOR TABLE 6

D Withheld to avoid disclosing figures for individual companies
NA Not available.
[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Fairfield	271, 272, 283, 307, 363, 365, 367, 371, 372, 383 and 395
Hartford	208, 227, 332, 335, 339, 357, 359, 361, 362, 364, 372, 382, 387, 396, 398 +399 +190
Litchfield	225, 335, 342, 356, 357, 387, 394 and 396
Middlesex	302, 356, 371 and 393
New Haven	265, 281, 282, 301, 302, 306, 317, 355, 362 372, 381, 384, 386, 387 and 394
New London	283, 335, 342, 355 and 373
Tolland	226
Windham	25, 26, 345 and 367

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.
[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 7--DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958



20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

Table 1.—MANUFACTURING EMPLOYMENT AND PAYROLL FOR THE STATE AND ITS STANDARD METROPOLITAN STATISTICAL AREAS: 1958 AND 1954

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State, standard metropolitan statistical area, and year	All establishments		Operating manufacturing establishments		Administrative offices and auxiliaries [1]	
	Number of employees	Payroll ($1,000)	Number of employees	Payroll ($1,000)	Number of employees	Payroll ($1,000)
DELAWARE:						
1958	r58 091	r348 645	40 491	191 783	r17 600	r156 862
1954	54 530	267 354	39 418	151 269	15 112	116 085
STANDARD METROPOLITAN STATISTICAL AREA						
WILMINGTON: [2]						
1958	r56 506	r371 995	39 178	216 228	r17 328	r155 767
1954	53 089	287 695	37 919	170 700	15 170	116 995

[1] In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2] The Wilmington Standard Metropolitan Statistical Area consists of New Castle County, Delaware; and Salem County, New Jersey.

r Revised.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

Year	Establishments, number		All employees [1]		Production workers			Value added by manufacture, adjusted [2]	Capital expenditures, new	Number of employees [1] for the United States and comparative indexes			
	Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)	Number of employees, United States	Index of employment change 1954 = 100		State or SMSA as a percent of the United States

NA Not available. r Revised.

[1] Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2] For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3] The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4] The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5] See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
32 except 3273	478	4 897	522	3 213
327 except 3273	244	1 743	206	1 087

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

* The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries, total."

[2] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[3] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[4] Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

WASHINGTON, D.C.:[2]						
1958	r35 020	r179 591	34 046	172 108	r974	r7 483
1954	30 705	133 465	30 373	131 088	332	2 377

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Washington, D.C., Standard Metropolitan Statistical Area consists of the District of Columbia; Alexandria and Falls Church Cities, and Arlington and Fairfax Counties, Virginia; Montgomery and Prince Georges Counties, Maryland.

rRevised.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

	STANDARD METROPOLITAN STATISTICAL AREAS (None with 40,000 or more manufacturing employees)												

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification contained in these figures. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
[illegible]	3.0	4 2 3	243	1 357

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment (s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Jacksonville Standard Metropolitan Statistical Area consists of Duval County, Florida.

[3]The Miami Standard Metropolitan Statistical Area consists of Dade County, Florida.

[4]The Orlando Standard Metropolitan Statistical Area consists of Orange and Seminole Counties, Florida.

[5]The Pensacola Standard Metropolitan Statistical Area consists of Escambia and Santa Rosa Counties, Florida.

[6]The Tampa-St. Petersburg Standard Metropolitan Statistical Area consists of Hillsborough and Pinellas Counties, Florida.

[7]The West Palm Beach Standard Metropolitan Statistical Area consists of Palm Beach County, Florida.

rRevised.

	STANDARD METROPOLITAN STATISTICAL AREAS (None with 40,000 or more manufacturing employees in this State)												

NA Not available. rRevised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

D Withheld to avoid disclosing figures for individual companies. [r]Revised.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. r Revised.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification contained in these figures. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see the Appendix to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	5 293	33 187	4 200	27 000
32 except 3273	8 726	70 669	5 325	36 843
327 except 3273	6 196	44 477	4 095	23 575
3441 and 3449	2 758	20 547	1 428	9 014
35 and 36	9 044	65 283	6 720	23 150

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(This State contained no standard metropolitan statistical area with 40,000 manufacturing employees in 1958 or 1954.)

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies. r Revised.
NA Not available.

[1] The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies.

County	Industry Group	County	Industry Group
Broward	271 and 373	Manatee	203
Dade	271	Nassau	263
Duval	209, 212, 263, 265 and 271	Orange	398 + 399 + 190
Escambia	262, 264, 282 and 286	Pasco	203
Gadsden	214	Pinellas	361, 369 and 372
Gulf	263	Polk	349
Hillsborough	265, 327, 341, 344 and 373	Putnam	262 and 264
Leon	244		

[2] The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.
[4] Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Atlanta Standard Metropolitan Statistical Area consists of Clayton, Cobb, De Kalb, Fulton and Gwinnett Counties, Georgia.

[3]The Augusta Standard Metropolitan Statistical Area consists of Richmond County, Georgia and Aiken County, South Carolina.

[4]The Chattanooga Standard Metropolitan Statistical Area consists of Walker County, Georgia and Hamilton County, Tennessee.

[5]The Columbus Standard Metropolitan Statistical Area consists of Chattahoochee and Muscogee Counties in Georgia and Russell County, Alabama.

[6]The Macon Standard Metropolitan Statistical Area consists of Bibb and Houston Counties, Georgia.

[7]The Savannah Standard Metropolitan Statistical Area consists of Chatham County, Georgia.

[r]Revised.

Table 2.–GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	8 791	71 650	7 204	47 557
3441 and 3449	863	4 832	709	3 778
35 and 36	11 780	108 284	9 331	59 624

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

		CHATTANOOGA STANDARD METROPOLITAN STATISTICAL AREA ("All manufacturing" totals for the Chattanooga Standard Metropolitan Statistical Area (which includes Walker County in Georgia) appear in table 3. Industry Group Statistics for this area are shown in the 1958 Census of Manufactures report for the State of Tennessee)										

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries, total."

[2]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 6.—GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

Upson	221, 226, and 229
Walker	221, 223, and 225
Walton	20
Ware	212
Wayne	24 and 261
Whitfield	221 and 228

[2]The 1958 and 1954 County totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

State, county, and size class	Establishments, total	Number of establishments by major industry group (See headnote for titles)—

Table 1.—MANUFACTURING EMPLOYMENT AND PAYROLL FOR THE STATE AND ITS STANDARD METROPOLITAN STATISTICAL AREAS: 1958 AND 1954

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State, standard metropolitan statistical area, and year	All establishments		Operating manufacturing establishments		Administrative offices and auxiliaries[1]	
	Number of employees	Payroll ($1,000)	Number of employees	Payroll ($1,000)	Number of employees	Payroll ($1,000)
IDAHO:						
1958	r27 582	r128 146	27 239	126 015	r343	r2 131
1954	24 197	94 221	24 024	92 986	173	1 235
STANDARD METROPOLITAN STATISTICAL AREAS						
(None in this State)						

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

rRevised.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

	STANDARD METROPOLITAN STATISTICAL AREAS (None in this State)												

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2] The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5] Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(This State contained no standard metropolitan statistical area with 40,000 or more manufacturing employees in 1958 or 1954)

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

NA Not available.

[1] The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Butte	281
Canyon	203
Clearwater	241 and 242
Gem	242
Nez Perce	242 and 263
Power	281

[2] The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

[1] In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2] The Champaign-Urbana Standard Metropolitan Statistical Area consists of Champaign County, Illinois.

[3] The Chicago Standard Metropolitan Statistical Area consists of Cook, Du Page, Kane, Lake, McHenry, and Will Counties, Illinois.

[4] The Chicago, Illinois-Northwestern Indiana Standard Metropolitan Statistical Area consists of the Chicago Standard Metropolitan Statistical Area and the Gary-Hammond-East Chicago Standard Metropolitan Statistical Area (which includes Lake and Porter Counties, Indiana).

[5] The Davenport-Rock Island-Moline Standard Metropolitan Statistical Area consists of Scott County, Iowa; and Rock Island County, Illinois.

[6] The Decatur Standard Metropolitan Statistical Area consists of Macon County, Illinois.

[7] The Peoria Standard Metropolitan Statistical Area consists of Peoria and Tazewell Counties, Illinois.

[8] The Rockford Standard Metropolitan Statistical Area consists of Winnebago County, Illinois.

[9] The St. Louis Standard Metropolitan Statistical Area consists of St. Louis City and Jefferson, St. Charles, and St. Louis Counties, Missouri; and Madison and St. Clair Counties, Illinois.

[10] The Springfield Standard Metropolitan Statistical Area consists of Sangamon County, Illinois.

r Revised.

Table 2.–GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

Year	Establishments, number		All employees[1]		Production workers			Value added by manufacture, adjusted[2]	Capital expenditures, new	Number of employees[1] for the United States and comparative indexes			
	Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)	Number of employees, United States	Index of employment change 1954 = 100: State or SMSA	Index of employment change 1954 = 100: United States	State or SMSA as a percent of the United States

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	38 033	241 197	26 791	189 652
275 and 276	41 654	371 691	43 207	327 170
327 except 3273	34 771	377 482	32 684	286 778
327 except 3273	3 322	37 613	2 666	23 330
344 and 3449	10 490	114 048	6 504	57 181

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[4]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954–Continued

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

Ind. code	County and industry group[1]	1958									1954	
		Establishments, number		All employees		Production workers			Value added by manufacture, adjusted	Capital expenditures, new	All employees, number	Value added by manufacture, unadjusted
		Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)		($1,000)

Williamson	239, 363, and 367
Winnebago	285, 343, 352, 371, 372, and 382

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.
[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

[1] In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2] The Anderson Standard Metropolitan Statistical Area consists of Madison County, Indiana.

[3] The Chicago, Illinois—Northwestern Indiana Standard Metropolitan Statistical Area consists of the Chicago Standard Metropolitan Statistical Area (which includes Cook, DuPage, Kane, Lake, McHenry, and Will Counties in Illinois) and the Gary-Hammond-East Chicago Standard Metropolitan Statistical Area (which includes Lake and Porter Counties in Indiana.)

[4] The Evansville Standard Metropolitan Statistical Area consists of Vanderburgh County, Indiana; and Henderson County, Kentucky.

[5] The Fort Wayne Standard Metropolitan Statistical Area consists of Allen County, Indiana.

[6] The Gary-Hammond-East Chicago Standard Metropolitan Statistical Area consists of Lake and Porter Counties, Indiana.

[7] The Indianapolis Standard Metropolitan Statistical Area consists of Marion County, Indiana.

[8] The Louisville Standard Metropolitan Statistical Area consists of Jefferson County, Kentucky; and Clark and Floyd Counties, Indiana.

[9] The Muncie Standard Metropolitan Statistical Area consists of Delaware County, Indiana.

[10] The South Bend Standard Metropolitan Statistical Area consists of St. Joseph County, Indiana.

[11] The Terre Haute Standard Metropolitan Statistical Area consists of Vigo County, Indiana.

r Revised.

Table 2.–GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

Year	Establishments, number		All employees[1]		Production workers			Value added by manufacture, adjusted[2]	Capital expenditures, new	Number of employees[1] for the United States and comparative indexes

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

D Withheld to avoid disclosing figures for individual companies. rRevised.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

Table 4.–GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data. [r]Revised.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	9 048	75 781	7 543	49 723
275 and 276	5 460	40 426	4 880	30 038
331 and 339	61 507	818 268	66 928	647 855
3441 and 3449	5 792	45 032	5 028	46 284
35 and 36	121 928	1 120 504	131 177	1 039 507
32 except 3273	24 985	237 866	23 926	179 295
327 except 3273	2 974	34 303	4 166	32 006

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

Ind. code	Industry	1958									1954

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries, total."

[2]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies.
NA Not available.

[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Adams	209 and 362
Allen	23, 306, 331, 335, 361, 362, 366, and 371
Bartholomew	251, 332, 351, and 356
Blackford	243 and 26
Cass	362
Clark	284, 289 and 324
Clay	372
Dearborn	208
De Kalb	371
Delaware	251, 322, 332, 346, 369, and 371
Dubois	252
Elkhart	251, 265, 283, 306, 349, 367, 371, and 382
Fayette	356 and 363
Floyd	231 and 243
Fountain	332
Gibson	201 and 361
Grant	265, 322, 335, 367, and 371
Hamilton	306
Henry	307 and 371
Howard	275, 32, 331, 335, 365, and 371
Huntington	367
Jackson	314 and 371
Jay	232 and 322
Johnson	371
Lake	202, 204, 232, 271, 273, 281, 284, 291, 307, 324, 327, 329, 331, 332, 334, 339, 344, 345, 346, 349, 371, 374, and 394
La Porte	251, 352, 356, 374, and 398 + 399 + 190
Lawrence	328 and 336
Madison	364 and 369
Marshall	379
Martin	32
Monroe	328, 362 and 365
Montgomery	273
Noble	358
Orange	251 and 365
Perry	251 and 367
Porter	349
Randolph	322 and 342

Vigo	203, 204, 209, 26, 289, 307, 344, and 361
Wabash	306 and 38
Warren	282
Washington	251
Wayne	335, 346, 354, 359, 371, and 398 + 399 + 190
Wells	362
White	251
Whitley	353

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.
[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

[1] In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2] The Cedar Rapids Standard Metropolitan Statistical Area consists of Linn County, Iowa.

[3] The Davenport-Rock Island-Moline Standard Metropolitan Statistical Area consists of Scott County, Iowa; and Rock Island County, Illinois.

[4] The Des Moines Standard Metropolitan Statistical Area consists of Polk County, Iowa.

[5] The Dubuque Standard Metropolitan Statistical Area consists of Dubuque County, Iowa.

[6] The Omaha Standard Metropolitan Statistical Area consists of Douglas and Sarpy Counties, Nebraska; and Pottawattamie County, Iowa.

[7] The Sioux City Standard Metropolitan Statistical Area consists of Woodbury County, Iowa.

[8] The Waterloo Standard Metropolitan Statistical Area consists of Black Hawk County, Iowa.

r Revised.

Table 2.–GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

STANDARD METROPOLITAN STATISTICAL AREAS (None with 40,000 or more manufacturing employees in this State)													

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

Table 4.—GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1958 AND 1954

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification contained in these figures. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
32 except 3273	4 894	71 700	5 381	54 229
327 except 3273	2 222	32 981	2 303	25 595
35 and 36	46 039	465 160	40 930	289 900

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(This State contained no standard metropolitan statistical area with 40,000 manufacturing employees in 1958 or 1954)

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

TABLE 6 FOOTNOTES

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies.

County	Industry group
Black Hawk	201, 202, 346 and 352
Buena Vista	20
Cerro Gordo	201 and 324
Clinton	204, 243 and 282
Des Moines	353, 367, 398 + 399 + 19
Dubuque	201, 243 and 352
Floyd	352
Hamilton	203
Iowa	363
Jackson	351
Jasper	363
Lee	204, 307, 33 and 395
Linn	201 and 366
Marion	243
Marshall	343 and 349
Muscatine	243
Polk	201, 271, 272, 301 and 372
Scott	201, 332, 335, 352 and 381
Wapello	201 and 352
Webster	201
Woodbury	365

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products

[1] In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2] The Kansas City Standard Metropolitan Statistical Area consists of Clay and Jackson Counties, Missouri; Johnson and Wyandotte Counties, Kansas.

[3] The Topeka Standard Metropolitan Statistical Area is coextensive with Shawnee County, Kansas.

[4] The Wichita Standard Metropolitan Statistical Area is coextensive with Sedgwick County, Kansas.

r Revised.

Table 2.–GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
32 except 3273	5 240	65 920	5 296	56 053
327 except 3273	914	11 030	2 663	28 602
3441 and 3449	1 435	13 219	1 331	8 098
35 and 36	9 869	79 114	8 538	65 731

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

Ind. code	Industry	1958									1954	
		Establishments, number		All employees		Production workers			Value added by manufacture, adjusted	Capital expenditures, new	All employees, number	Value added by manufacture, unadjusted
		Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)		($1,000)
		"All manufacturing" totals for the Kansas City (Kansas) - Kansas City (Missouri) Standard Metropolitan Statistical Area (which includes Johnson and Wyandotte Counties in Kansas) appear in table 3. Industry group statistics for this area are shown in the 1958 Census of Manufactures report for the State of Missouri.

D Withheld to avoid disclosing figures for individual companies.
NA Not available.

[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Atchison	332
Cherokee	281
Cowley	201
Johnson	289
Shawnee	272 and 301
Wyandotte	201, 205, 25, 265, 284, 291, 329, 344, 356 and 371

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.

[1] In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2] The Cincinnati Standard Metropolitan Statistical Area consists of Hamilton County, Ohio; and Campbell and Kenton Counties, Kentucky.

[3] The Evansville Standard Metropolitan Statistical Area consists of Vanderburgh County, Indiana; and Henderson County, Kentucky.

[4] The Huntington-Ashland Standard Metropolitan Statistical Area consists of Cabell and Wayne Counties, West Virginia; Boyd County, Kentucky; and Lawrence County, Ohio.

[5] The Lexington Standard Metropolitan Statistical Area consists of Fayette County, Kentucky.

[6] The Louisville Standard Metropolitan Statistical Area consists of Jefferson County, Kentucky; and Clark and Floyd Counties, Indiana.

r Revised.

NA Not available. rRevised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. r Revised.

[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2] The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5] Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

r Revised.

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
32 except 3273	4 607	40 631	4 589	31 237
327 except 3273	641	4 966	697	3 986
3441 and 3449	1 165	8 936	513	4 147
35 and 36	29 812	370 897	20 893	156 803

[6] Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

Ind. code	Industry	1958									1954	
		Establishments, number		All employees		Production workers			Value added by manufacture, adjusted	Capital expenditures, new	All employees, number	Value added by manufacture, unadjusted
		Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)		($1,000)
		"All manufacturing" totals for the Cincinnati Standard Metropolitan Statistical Area (which includes Campbell and Kenton Counties in Kentucky) appear in table 3. Industry group statistics for this area are shown in the 1958 Census of Manufactures report for the State of Ohio.
